

Energy is Intelligence

Amit Goswami in his amazing book, *The Self-Aware Universe*, while calling for a new worldview paradigm that will integrate mind and spirit into science proposes: *“this new paradigm is the recognition that modern science validates an ancient idea - the idea that consciousness, not matter, is the ground of all being.”*

The work of the subtle anatomy, the mapping of the structure, and the development of Sacred Anatomy Energy Medicine is based on the application of the profound idea that energy is intelligent. Seen and used as a fundamental principle, it is clear that if all things have consciousness, they also have intelligence. Not human intelligence, but innate and organic intelligence with the capacity to act purposefully in some way. When you apply this idea to interaction with subtle energy you get results. Use this essential course to experience this new paradigm for yourself.
