

The HEMF, (the Human Electromagnetic Field) is the source of human entanglements. A thin thread of electromagnetic energy spins out and entangles with a person, place or thing that you encounter. There are thousands that occur in the course of a day. Normally, they dissipate in about 2 hours but when an activation occurs an entanglement can become an attachment. These are much more difficult to release.

Sacred Anatomy Energy Medicine Technique:

Sealing Electronic Equipment[©]

In the world today even the least of us need to learn how to cope with electromagnetic disturbances. One of the primary ways our tech impacts us is through the electromagnetic fields that surround them. Computers, cell phones, kitchen appliances, even cars put out electromagnetic radiation that impacts the Human Electromagnetic Field. Sealing your Electronic Equipment will last for the life of the machine unless the machine is “upgraded” or changed significantly. Doing this is a first step in making friends with the energies of the 21st century and how we interact with them.

Sacred Anatomy Energy Medicine Technique:

Sealing Electronic Equipment

1. Decide what you choose to seal. It doesn't matter if the gear is turned on or off to seal it.

2. Sense into the EMFs around the machines. Try to see how far out it is. Determine the shape of the field.
3. Bring in *Universal Love and Light* letting it build up on your hands.
4. Pull the electromagnetic field of your tech down and push it into the tech. Tell the EMF to stay inside the piece of equipment "for the life of the machine."
5. Surround the tech with more *Universal Love and Light*, coating it liberally.
6. Push the *Universal Love and Light* into the tech while tell it to "stay in the computer/phone/microwave for the life of the machine."
7. Surround it again with another stream of *Universal Love and Light* wrapping it tightly.

Damaged HEMF- White spots are dead zones.
