

MIAMI-DADE COUNTY

Solar trees throughout the zoo provide shade, a place to charge your cell phone — and support the zoo's conservation mission by generating clean energy that sparks your interest in how solar energy works. Party animals also have a new spot to get even wilder under the solar pavilion, the coolest new location for Miami events.

FROM OUR COMMUNITY:

"Zoo Miami's mission is to share the wonder of wildlife and help conserve it for future generations, and having solar trees and a solar canopy for our visitors to see aligns with what we represent. We're proud that we can showcase clean energy here, thanks to the FPL SolarNow program."

Ron Magill
Communications Director

PLANTING THE SEEDS FOR A BRIGHTER FUTURE

FPL SolarNow solar trees and canopies are innovative solar structures created by the community for the community. They provide shade and harness the power of the sun to generate emissions-free energy that benefits all of us while encouraging future generations to learn more about solar energy.
