A Founder Society of the

United Engineering Trustees, Inc.

Established in 1904 for

American Society of Civil Engineers
American Institute of Mining, Metallurgical, and Petroleum Engineers
American Society of Mechanical Engineers
Institute of Electrical and Electronics Engineers
American Institute of Chemical Engineers

Report of the 1995 President

Frank V. Nolfi, Jr., President – 1995
American Institute of Mining,
Metallurgical, and Petroleum Engineers

Last year, 1994 AIME President Noel D. Rietman reported on the accomplishments in several important areas. Among these were the establishment of a “member direct” policy and updating the AIME Long Range Plan. I am pleased to report to the AIME Member Societies and their members on the significant progress in these areas and on other developments.

1995 AIME ANNUAL MEETING

A highly successful AIME Annual Meeting was held in Denver, Colorado in March hosted by the Society for Mining, Metallurgy and Exploration. The AIME Keynote Session, chaired by 1996 President Donald W. Gentry featured three distinguished speakers and was very well received. The annual banquet served to recognize the recipients of Honorary Membership as well as the other prestigious AIME Awards. An account of the 124th Annual Meeting may be found on page 8, followed by the names of the award winners.

TRADITION

As part of the AIME Long Range Plan, the Board approved the recommendation that the hosting of AIME Annual Meetings will rotate among the Member Societies to coincide with the presidential rotation, e.g., TMS in 1996, SME in 1997, ISS in 1998 and SPE in 1999. I thank all Member Societies who have so graciously hosted AIME and acknowledge their cooperation in planning for the future.

EDUCATION

With the generous support of both time and funds from many organizations and individuals, the *Transformations* Project continues to successfully support the partnerships which have been established between middle school teachers and practicing technologists and engineers. It has become increasingly apparent that AIME has launched a program that will continue to make important contributions to educational excellence for years to come. We are all indebted to the AIME Board of Trustees for their foresight in developing first the Video Series and then continuing to support the Project with matching funds over the years.

During 1995 we took steps to safeguard the investment that AIME and the co-sponsors have made in the program by separately incorporating the project and launching a fund drive to make it self-sustaining.

GOVERNMENT AFFAIRS THROUGH AAES

AIME government affairs activities continued during 1995 through the American Association of Engineering Societies (AAES) located in Washington, DC. These efforts involved a total of ten volunteers, each representing a Member Society, serving on the various AAES Councils, Commissions and Task Forces. As in previous
