

Joseph J. Poveromo

Joseph J. Poveromo received his Ph.D. in 1974 at the Center for Process Metallurgy, State U. of New York/Buffalo after receiving a BS Chem. Eng. from Rensselaer Poly in 1968. In 1968-69 he worked for Sinclair Oil as a process engineer in Harvey, Illinois. After receiving his Ph.D., he then joined Bethlehem Steel's Homer Research Laboratories where he worked from 1974 through early 1993; advancing to the position of Research Consultant. In 1993 he established his consultancy, Raw Materials & Ironmaking Global Consulting. From 1993 through 2008 his principal client was the Quebec Cartier Mining Company, for whom he served as Director Technology-International. Currently, he consults for steel, iron ore, other natural resource, technology provider, financial and consultancy companies on a global basis. Dr. Poveromo is a Distinguished Member of AIST (Assoc. of Iron & Steel Technology); his awards include the T. L. Joseph Award for long-standing contributions to ironmaking technology. He is also a Special Member of the IIMA (International Iron Metallics Association).
