

Medhat M. Kamal

Medhat (Med) M. Kamal is a Chevron Fellow Emeritus and the 2023 President of the International Society of Petroleum Engineers (SPE). He is an Honorary Member of AIME. He previously worked for Cairo University, Amoco Production Company, Flopetrol Schlumberger, and ARCO Exploration and Production Company.

Kamal has more than 50 years of industry experience in well testing, reservoir description, and production and reservoir engineering. He is the lead author and editor of SPE Monograph 23 “*Transient Well Testing*”, and has published more than 40 papers in various refereed SPE journals.

He was an SPE Distinguished Lecturer in 1997–1998 and 2018–2019, during which he presented his lectures more than 80 times in 35 countries. He served as a member and chairman of the SPE Annual Meeting Well Testing subcommittee, as well as the textbook and monograph committees, and as technical reviewer, associate editor, and executive editor for *SPE Reservoir Evaluation & Engineering Journal* and the *Journal of Petroleum Technology*, and is a member of the Peer-Apart group. He chaired the first SPE conference on research and development in 2007 and the Western Regional Meeting in 2019. He served on the boards of directors of Mid-Continent, Gulf Coast, Dallas, and Golden Gate sections of SPE and chaired the Dallas and Golden Gate sections. He also served on the SPE International Board of Directors (2007–2009) as the Regional Director of Western North America.

Kamal has been recognized with several regional and international awards, including the SPE Cedric K. Ferguson Medal, SPE Formation Evaluation Award, SPE Distinguished Service Award, SPE North and East Texas Regional Service Award, and the Texas Petroleum Engineer of the Year Award.

He holds a BSc in petroleum engineering and an MSc in engineering from Cairo University, as well as an MS and PhD in petroleum engineering with a minor in computer science from Stanford University.
