## Work Experience

### Software Engineer

Wisesight (January 2023 - Present)

- Designed and implemented robust data pipelines for data correctness, reliability, and scalability.
- Collaborated with teams, analyzed data sources, and implemented clean, maintainable code in Python, JavaScript (including TypeScript), and Go.
- Integrated with third-party providers and managed data warehouse in MongoDB for efficient data storage and retrieval.

### Software Engineer (Intern)

LINE MAN Wongnai (June-July 2022)

- Implement micro-service architecture with clean and maintainable code with GO.

### Software Engineer (Part-Time)

TECH BASECAMP CO., LTD. (December 2020 - December 2022)

- Led a team of software engineers to deliver high-quality software.
- Implemented web applications using Go, Javascript, and Typescript.
- Collaborated with frontend developers, designers, and customers to gather requirements and design.
- Designed system architecture to meet functional and non-functional requirements.

## Competitions & Projects

### Botnoi CJE Hackathon (1st place)

Responsibility : Back-end

Competitive, making line's chatbot with over 20,000 friends

### DEV Disrupt Hackathon by SCB

Responsibility : Full-stack

Competitive, making a mobile application with real time chat

### University's Election

Responsibility : Back-end

University's online election system

## Skills & Competencies

### Languages

Go	Java
Javascript	C
Typescript	C++
PHP	R
Python	SQL

### Frameworks & Tools

ReactJS	NodeJS
NextJS	Docker
Laravel	AWS
MongoDB	RabbitMQ

I'm a passionate and energetic fast learner

## Education

### Computer Engineering, KMUTT

Bachelor Degree (Graduated)

## Interest

Software Engineering
