the closed or open position

KEY FEATURES

LIGHTNING AND SURGE SUPPRESSION

Built in state of the art lightning and
surge protection.

FOOT PEDAL RELEASE

Simply step on the foot pedal and push the gate
open when power is not available.

COMMERCIAL/INDUSTRIAL APPLICATION

This operator is ideal for larger gates on
commercial or industrial type properties.

For easy access the Foot Release Model allows you to push the gate open during a power outage in case of an emergency with the use of a foot pedal, that disengages the operator from the gate. The foot pedal can be secured with a pad lock in the closed or open position and is used for gates up to 45 feet or 1000 pounds. For heavier applications try the Eagle-2000-FR-1HP model which has a 1 horsepower motor and built for gates up to 2000 lbs.
