

Broad-Spectrum. User-Friendly.

CHLORFEXISTM LLC

Hospital-Grade Disinfection Products

About Chlorfexis, LLC

Our company supplies products and equipment that are useful in controlling infectious diseases, and is an outgrowth of our backgrounds in human and veterinary medicine. We are a customer service-focused, high-touch company and operate by the Golden Rule. Sales help support our charity foundation. We share information freely because the more informed our customers are, the better we can serve them and the better they can utilize our products and consulting advice.

Avail. In 24ct. & 100ct. Bottles

Disinfectant Tablets: We distribute tablets that, when dissolved in regular tap water, yield an *incredibly* effective, yet benign, well tolerated, gentle, hospital-grade disinfectant called hypochlorous acid, which sounds scary but is actually nontoxic, biodegradable and what our own bodies produce to fight infection. Hypochlorous acid* has been lab-tested up to 300X more effective than bleach, but is great for people & pets due to its neutral pH. It can be wiped, sprayed, fogged or mopped. Unlike conventional, often toxic disinfectants,

pathogens can't develop resistance to hypochlorous, as it physically disrupts them so they cease to exist in a viable form. Our tablets are EPA registered and are on the EPA's List N of disinfectants effective against SARS-CoV-2, the emerging coronavirus that causes COVID-19. The tablets have a long list of EPA-approved kill claims against human and animal pathogens, including

Norovirus, E. coli, Canine parvovirus, H1N1, Athlete's Foot fungus and many more. Our tablets' solution kills 99.999% of bacteria in 60 seconds.

Starter Kit w/ 24ct. & A Stability Optimized™ Spray Bottle For Use With Our Tablets

These are the same tablets that we provided to personnel on the US Navy hospital ship COMFORT while docked in NYC during the pandemic, and which we supply to healthcare, veterinary and dental organizations in the USA and beyond, plus businesses, churches, schools, medical offices and individuals.

Other Products: Chlorfexis DriWipes™, strong enough to wring out and scrub with. The MobiMIST™ portable, lithium ion battery-powered sprayer that holds 5 gallons of solution and can dispense up to 40 gallons on a single charge. Stability Optimized™ gallon jugs and quart spray bottles that help extend our solution's shelf life. Vectorfog ULV cold foggers in both AC-powered and cordless, rechargeable configurations.
