Advertisement No: IL-AFS/2010/56

Date: 11th October 2010

1.0 Background

The Maldives Monetary Authority (MMA) was established on 1st July 1981, and is endowed with the regular powers and obligations of a central bank under the mandate provided by the MMA Act (1981). To this effect, the MMA issues currency, regulates the availability of the Maldivian rufiyaa and promotes its stability, licenses, supervises and regulates institutions in the financial sector, formulates and implements monetary policy, and advises the Government on issues relating to the economy and financial system in order to foster an environment conducive to the orderly and balanced economic development of the Maldives. A second amendment to MMA Act (1981) has been passed by the Majlis and ratified by the President on 5th April 2007. The new amendment of the Act provides for the autonomy of the MMA by separating the positions of the Finance Minister and the MMA Governor.

In accordance with the Authority's IT strategy to update its operational systems using technology to enhance information flow, gain efficiency and improve controls, MMA is planning to obtain an Enterprise Resource Planning (ERP) system. The proposed product will computerize the major activities of the Authority, which includes issuing currency and providing banking services to the Government of Maldives and all financial institutions in the country.

The ERP component will need to include Procurement/Inventory, General Ledger, Accounts Payable/Receivable, Payroll, Human Resource, Fixed Assets and external interfaces for Automated Clearing House (ACH), Real-time Gross Settlement Systems (RTGS), SWIFT system interface and other payment and settlement infrastructure. It is also expected that the ERP solution should support multi-currency online transaction processing, inquiry/transaction history facilities, currency issues and vault management. In addition, the product should include functionality for foreign exchange (management, remittances, sales/purchases).

MMA is planning to employ a consultant to provide independent consultancy for the analysis of requirements, establishing an integrated accounting system, and providing advisory during implementation of ERP system.

The selected firm will also be required to design and develop an Internal Audit manual, and set-up an effective internal audit system for the Internal Audit function of MMA.
