Date: 03/01/2023

### PROJECT ENGINEER

### TERMS OF REFERENCE

#### A. PURPOSE

The Government of the Republic of Maldives through Ministry of National Planning, Housing and Infrastructure is implementing the Housing projects across the Maldives through PSIP budget and intends to apply part of the proceeds for the selection of a Project Engineer for the implementation of this project by Ministry of National Planning, Housing and Infrastructure.

The Ministry of National Planning Housing and Infrastructure is seeking to hire Engineer to assist its housing technical team in development and implementation of housing development projects across Maldives.

#### B. OBJECTIVE AND PURPOSE OF THE ASSIGNMENT

1. The Ministry of National Planning, Housing and Infrastructure (MNPHI, the employer) is seeking to hire an individual consultant for housing related development projects. The purpose of the assignment is to deliver quality implementation and execution of projects.

2. Project Engineer (PE) will be recruited to fully execute and perform all project management and implementation activities prior to and throughout the project duration and should be involved in the detailed design, procurement, construction, technical assistance, commissioning stages and post-defect liability periods.

#### C. OVERALL RESPONSIBILITY

The overall responsibilities of the PE include, but are not limited to the following;

1. Provide assistance to the project team in all technical aspects of the project.

2. Carryout inspection trips to project sites to monitor the civil works and ensure compliance with general requirements of engineering standards/practices including the environmental issues as applicable to the project.
3. The PE will implement all activities assigned in the scope of services with the overall responsibility to complete the project within the allocated timeline, in strict compliance with the government procedures and guidelines, as well as with the relevant project agreements between the Government and its stakeholders.

#### **D. SCOPE OF SERVICES**

The tasks of the Project Engineer will include but is not limited to the following:

1. Supervise the construction activities of housing development related projects.
2. Review monthly reports submitted by the Contractor and undertake monthly progress meetings with the Contractor. Issues such as progress, current spending, schedule update, problems encountered and changes in contract must be raised and handled in a timely manner through these progress reviews.
3. Provide technical input when required.
4. Organize and facilitate stakeholder consultations and project review meetings as required and solve problems arising during construction under the guidance of the Project Director and Director General.
5. Conduct field visits as required to verify project activities relative to stated targets and give site specific instructions where necessary.
6. Participate in construction oversight activities during civil works, and maintain regular meetings, maintaining logs and records of the progress, issue of change notices and approval of payments.
7. Provide consultancy works for detailed design, project cost estimates, bidding documents and reports.
8. Provide and ensure quality assurance of works and services of construction supervision consultant.
9. Liaise with local authorities to ensure smooth implementation of the procurement of goods and services in accordance to national guidelines, and be responsible for the subsequent contract administration. This includes, but not limited to the coordination of

all activities in assurance of the construction as per the qualitative benchmarks set under the contract specifications.

10. Ensure that construction goes according to the contract document and work schedule.
11. Review the operation and maintenance manuals submitted by the contractors; and provide guidance where necessary in establishing operation and maintenance procedures in consultation with project stakeholders
12. Provide necessary justification to MNPHI and get approval for any changes in construction, specification or drawings.
13. Ensure implementation of social and environmental safeguards requirements.
14. Liaise with local authorities to ensure smooth implementation of project and resolve any issues related to on-site activities.
15. Inspect the quality control tests carried out by the Contractor and ensure that quality is controlled to the level specified in the contract document.
16. Ensure any defective work is completed and project closing out procedures is carried out smoothly.
17. Coordinate closing out activities for the project which include technical reports and handing over of documents as necessary. Check and verify as-built drawings.
18. Assist employer in other related works.

## **E. QUALIFICATIONS AND EXPERIENCE**
