PROJECT OFFICER

Advertisement Reference: (IUL)471-CDS5/471/2023/39

Date:02.02.2023

A. BACKGROUND

Government of Maldives (GOM) has committed to developing an efficient, reliable, convenient and sustainable national public ferry system to ensure all Maldivian citizens are connected to the country's economic infrastructure and social services which is reflected in the Strategic Action Plan 2019-2023. The Government aims to operationalize an efficient public ferry service in all administrative areas by 2024 through the **Integrated National Public Ferry Network Project**. This would be the very backbone of the long-term strategic planning framework, National Spatial Plan, designed to achieve regional development in the Maldives through a balanced distribution of resources ensuring inclusive, integrated, smart and resilient development. The National Public Ferry Network will also contribute in achieving Sustainable Development Goals through its broad range of socio-economic impacts. The envisioned national public ferry system will be an integrated service comprised of high-speed passenger ferry service and scheduled cargo ferry services.

Low-lying islands clustered into 26 geographic, Maldives' resident population is distributed across 188 inhabited islands. Apart from Male', only 4 other administrative islands have a population above 5000 and two third of the islands have a population less than 1000. This dispersion of population makes it more challenging and costly in providing transport services creating difficulties for the public to access basic services. Covid-19 pandemic hit hard globally, slowing down the economy of Maldives significantly making it more vital for sustainable transport systems for inter-island connectivity, access to services, economic activities and trade within the country.

The public ferry system will link maritime transport with land and air transport for a seamless transfer of passenger and cargo movement across the country. The system will also include support infrastructure such as ferry terminals and access infrastructure built to modern architectural standards, universal accessibility design and high customer comfort and convenience.

The project is planned to be rolled out across 6 zones of the Maldives in three phases;

- 2021- Phase 1- Zone 1 (Haa Alif, Haa Dhaalu, Shaviyani Atoll)
- 2022- Phase 2- Zone 2 (Noonu, Raa, Baa, Lhaviyani Atoll) and Zone 4 (Meemu, Faafu, Dhaalu, Thaa, Laamu Atoll)
- 2023- Phase 3- Zone 3 (Kaafu, Alif Alif, Alif Dhaalu, Vaavu Atoll), Zone 5 (Gaafu Alifu, Gaafu Dhaalu Atoll) and Zone 6 (Gnaviyani, Seenu Atoll)

B. SCOPE OF WORKS

The work of the Project Officer will include the following tasks, among others:

1. Secretariat to Steering Committee and Technical Committee
2. Overall management of PMU administrative work and logistics
3. Organize and secretariat to; project coordination meetings (with contractor) and other project related stakeholder meetings
