

# INFORMATION SHEET FOR PROCUREMENT OF 1600kW GENERATOR SET

**Reference No.: FNK-I/IUL/2023/242** 

Issued on 19th June 2023

Issued by:

Fenaka Corporation Limited Male', Republic of Maldives

## **Section I: Instruction to Bidders**

A. General	A. General				
1. Scope of Bid	<b>be of Bid</b> 1.1 Fenaka Corporation Limited requests quotations for 1600kW generator set(s)				
a		accordance with Section III, Technical Specifications			
	1.2	It is in Fenaka Corporation Limited's discretion to cancel the bid invitation			
mentioned in 1.1 at any time.					
2. Eligible	<b>2. Eligible</b> 2.1 Local companies registered in Maldives are eligible to participate in the t				
Participants	Participants2.2Foreign companies are eligible to participate in the tender only if the total				
	is above 2,500,000 Maldivian Rufiyaa.				
B. Preparat	ion of	the Bid			
3. Bid Prices	<b>Bid Prices</b> 3.1 The unit price of each item and the total price shall be clearly indicated				
		quotation			
	3.2	All items shall be quoted in the bid (please refer to Section III, Technical			
		Specifications for the details of required items)			
3.3 Quo		Quotation shall separately indicate the additional charges such as freight charges			
and Insurance.		and Insurance.			
	3.4	The bidder shall submit quotation on CIF basis to Male' port			
4. Currency	4.1	The bidder shall quote entirely in Maldivian Rufiyaa			
5. Alternative	5.1	Bidders can submit a maximum of two (2) options			
Bids					
6. Validity of	6.1	Quotation shall remain valid for minimum sixty (60) days from the date of bid			
Bids		opening			
7. Bid Security	7.1	All bids should be accompanied with a bid security of USD 3,000 (ThreeThousand			
		US Dollars) or its equivalent in Maldivian Rufiyaa			
7.2 The bid security should be:		The bid security should be:			
	- Original bank guarantee letter (or)				
		- Bank guaranteed and stamped check (or)			
	- An insurance policy from Maldives Monetary Authority (MMA) registered				
		insurance company			
	7.3	Any bid not accompanied by a Bid Security shall be rejected during bid opening

Page 2 of 9

	7.4	The bid security must be valid for a minimum of twenty (20) additional days
	/	beyond the validity of quotation
	0.1	
		All relevant information including the brand shall be given to enable technical
Compliance		evaluation of quoted items
	8.2	The documents required for technical evaluation are:
		- Technical data sheets of engine and the alternator
		- Datasheets specifying cooling system rated at ambient temperature 50°C
		- Certificate of Authenticity specifying manufacturer/assembler is an OEM or a
		genuine reputed international engine brand
	8.3	If the manufacturer or assembler is not the same as the bidder, a document
		indicating that manufacturer or assembler is willing to sell the generator set to the
		bidder is required
	8.4 Technical compliance letter will be required to enable technical ev	
8.5 If the goods do not comply with the require		If the goods do not comply with the requirements mentioned in Section III,
		Technical Specifications, the bid will be rejected during evaluation.
8.6 Generator set should comply with our requirement		Generator set should comply with our requirements, if not the bid will be rejected
9. Documents 9.1 Quotation (inclusive of the delivery period and payment terms)		Quotation (inclusive of the delivery period and payment terms)
<b>Comprising</b> 9.2 Specifications of the offered product		Specifications of the offered product
the Bid	9.3	Certificate of Authenticity specifying that manufacturer / assembler is an OEM of
		a genuine reputed international engine brand
	9.4	Details of the company
		- Company profile/background
		- Company registration certificate
	- GST registration certificate (for local bidders only)	
	- TAX clearance report (6 months validity)	
	- Contact details (name, designation, mobile number and e-mail address)	
	9.5 Experience letters, if available	
	- Letters within past five (5) years	
	- Relevant experience letters	
	- Letters with project name and value	
	9.6	One (1) compact disc with original bid document scanned and written
I		

CORPORATION LIMITE	Mulaives			
	9.7 Bids lacking the documents above are subjected to be rejected during the b			
		opening		
10. Format of	The Bidder shall submit two (2) sets of the bid document (1 original and 1 copy),			
Bid		enclosed separately in two envelopes and sealed with company stamp		
	10.2	All pages of the bid document shall be stamped and bound properly (excluding the		
		bid security)		
C. Bid Subm	ission			
11. Sealing and	11.1	The bid document shall be sealed properly in an envelope clearly marked		
Marking Bid		'ORIGINAL' or 'COPY', with the name of the company and the tender reference		
Document	Document number (FNK-I/IUL/2023/242)			
12. Bid	12.1	The bids will be opened on 3 <sup>rd</sup> July 2023, 11:00hrs in the presence of bidders		
Opening	<b>pening</b> 12.2 Bids will be opened at:			
		Fenaka Corporation Limited		
		Hilaalee Magu, K. Male', Republic of Maldives		
	12.3	Bids received electronically will not be accepted		
13. Bid	<b>3. Bid</b> 13.1 Bidders that arrive after bid submission deadline shall not be able to part			
Rejection		the bid		
	13.2	Bidders that do not register for the tender are unable to participate in the bid		
		opening		
	13.3	Bids lacking the documents mentioned in 9. Documents Comprising the Bid		
(except 9.5 Experience lette		(except 9.5 Experience letters) and that do not comply with 10. Format of Bid are		
		subjected to be rejected		
D. Awarding	g of Co	ontract		
14. Payment	14.1	An advance will not be released for this project		
Terms	14.2	Proposed payment terms should not be tied with submission of Bill of Lading.		
15. Factory	15.1	The generator(s) shall be fully tested at the manufacturer workshop in the presence		
Acceptance	e of Client's appointees.			
Testing	<b>g</b> 15.2 The testing shall be conducted at internationally accepted testing standards			
	15.3	Generator(s) should be tested to run at 25%, 50%, 75%, 100%, and 110% of rated		
		load and power factor until the engine temperature stabilized for 30 minutes, and		
		should check the protections below:

CORPORATION LIMITED		Maldives
		- Lub oil low level (alarm testing)
		- Lub oil low pressure (alarm testing)
		- Earth fault (alarm testing)
		- Over current (alarm testing)
		- High temperature (alarm testing)
		- Cooling system (alarm testing)
		- High voltage pressure (alarm testing)
		- All the functioning tests and routine tests should be done
1	15.4	All the protections should work properly, it should be examined for oil and coolant
		leaks, and it should be visually tested and secured
1	15.5	The remote radiator should operate continuously 100% in a 50-degree ambient
		temperature
		- It should be designed with vertical air discharge remote radiator with motor and
		fan
		- It should include all the generator connection pipes, accessories, joints and
		diagrams
		- The radiator should be developed remotely from the engine providing an added
		flexibility cooling system, and to be installed at the desired location
		- It should be designed with lower power consumption, and high efficiency aero
		foil designed fans are used
		- It must be designed with lower noise levels
		- The radiator core should be formed using high efficiency fin profile
		- The thickness of connection pipes must be in a range of 2mm to 4mm
1	15.6	Two (2) engineers from Fenaka Corporation Limited shall carry out necessary
		inspection and testing of equipment prior to shipment in supplier's warehouse to
		validate the items
1	15.7	The bidder shall arrange airfare, transportation, stipend (as per the Client's policy),
		accommodation and lodging for two of Client's engineers for the testing (minimum
		two days for testing)

### **Section II: Evaluation Criteria**

Proposal Cost: 70 points for the lowest price

- (Lowest price / proposed price) x 70

**Delivery**: 20 points for the lowest delivery period

- (Lowest delivery period / proposed delivery period) x 20
- If the delivery period indicates 'ex-stock', it shall be taken same as the party offering the longest delivery period.

Credit Period: 10 points for the maximum credit period

- (Proposed credit period / longest credit period) x 10

**Note:** Any discrepancy in technical details specified in quotation with technical specification document, the specification shall prevail.

Port Complex Building, 7th Floor, Hilaalee Magu, Male, 20207, Maldives

## **Section III: Technical Specifications**

\*Please note that the below specifications are for one unit only.

#### Information of 1600 kW Generator Set

Description	Unit	Qty
	1	No
Diesel Generator set 1600 kW prime rated (open type) with parameters 0.8 P.F.	i	
415Volts, 3 Phase, 4 wires, 50 Hz at 1500 r.p.m.		
The Generator set shall be powered by a branded an Original Company's Licensed OEM		
manufactured.		
The engine must produce a mechanical power output (kW) which should meet the		
required electric power (kW) of 1600kW and must be coupled with a 1600kW Stamford		
Alternator with pre-installed Droop CT and Control connection(terminal box to connect)		
Engine to be complete with following auxiliary items :		
Heavy electrical flywheel		
SAE flywheel housing		
• Air filters, Lubricating Oil Filters, Fuel Filters and all other such filter required for		
operation of the engine		
Low lubricating oil pressure switch		
High engine temperature switch		
Iube oil sender		
Water Temperature Sender		
<ul> <li>All necessary items to run and to protect the engine</li> </ul>		
<ul> <li>Starting equipment fitted to engine, consisting of :</li> </ul>		
<ul> <li>24 Volt charging alternator (Brushless)</li> </ul>		
<ul> <li>24 Volt starting motor</li> </ul>		
Fuel Shut-off solenoid		
<ul> <li>Heavy duty lead acid batteries, supplied in a dry charged condition</li> </ul>		
Governing System		
The engine to be fitted with a close tolerance Electronic Governing system, which should		
include efc, actuators, magnetic pickups, etc, including wiring		
Cooling Equipment		
Cooling equipment compromising a heavy-duty tropical type W type remote radiator,		
With fan driven by the Electric Motor (ABB or Equivalent) The radiator core should be		
electroplated with silver solder tin plated to prevent early failure due to corrosion.		
Radiator must be designed to adequately cool the generator at an ambient temperature		
of 50°C		
Coupon blue coated radiator is acceptable.		
• Exhaust system	ĺ	
450 mm of stainless steel below type flexible exhaust, together with suitable flanges and		
fittings shall be supplied for each silencer.

Page 7 of 9

The olternator shall be brushless revolving type alternator (0.8 P.F, 415kV, 3 Phase, 4 wires, 50       If 2), Naving class H insulation on both the stator and field windings. It shall be built and rated to BS 5000, trapically impregnated with voltage regulation being in the order of +1.5% from no load to full load under the steady state conditions assuming a speed variation nat exceeding 4% on the engine. Anti-Condensation Coll to be fitted in the Alternator.         • Generator arrangement and drive       The simplex type base plate is of heavy duty rolled steel constructed, bolted and electrically welded, diffied on the underside to allow the fitted in the Alternator.         • Generator arrangement and drive       1         The simplex type base plate is of heavy duty rolled steel constructed, bolted and electrically welded, diffied fitte on allow the fitted in the Alternator.         • Generator arrangement and drive       1         No       After assembling the genset zinc coated self-etching primer should be applied to the complete self the outiet connections and a fuel filter, fitted with outlet connection is to be mounted underside on formity with fuel flow diagram.       1       No         1.3       Factory testing       1       No         1.4       Literature and drawings consisting of : (Optional)       1       No         1.5       Accessories       I dividite fitte generation equipment       1       No         1.6       Literature and drawings consisting of : (Optional)       1       Lot       1         1.8       No X	Į	Alternator	I	1
The simplex type base plote is of heavy duty rolled steel constructed, bolted and electrically welded, dilled on the underside to allow the fitting of foundation bolts. The engine and the alternator are to be mounted on a base plate and vibration mounts to be mounted underside of the base plate. <ul> <li>Finishing</li> <li>After assembling the genset zinc coated self-etching primer should be applied to the complete set.</li> <li>Fuel system</li> <li>A fuel day tank capacity 4000 liters complete with level indicator, drain plug, filler, fuel return with fuel outle connections and fuel filter fitted with outlet connection is to be mounted. These mounts are to be supplied as loase item. All necessary fittings to be supplied in conformity with fuel flow diagram.</li> </ul> <li> <ul> <li><b>factory testing</b></li> <li><b>factory testing</b></li> <li><b>l</b></li> <li>No</li> </ul> </li> <li> <li><b>factory testing</b></li> <li><b>l</b></li> <li><b>l</b></li> <li><b>No</b> Kengine ports chald be fully tested at the manufacturer workshop in the presence of client/appointees to check the ratings, overload, functional tests on a dummy load prior to dispatch.</li> <li><b>l</b></li> <li><b>l</b></li></li>		Hz), Having class H insulation on both the stator and field windings. It shall be built and rated to BS 5000, tropically impregnated with voltage regulation being in the order of +/- 1.5% from no load to full load under the steady state conditions assuming a speed variation not exceeding		
welded, dilled on the underside to allow the fitting of foundation bots. The engine and the alternator are to be mounted on a base plate and vibration mounts to be mounted underside of the base plate. <ul> <li>Finishing</li></ul>		Generator arrangement and drive		
After assembling the genset zinc coated self-etching primer should be applied to the complete set.       I         1.2       Fuel system       1       No         A Juel day tank capacity 4000 liters complete with level indicator, drain plug, filler, fuel return with fuel outlet connections and a fuel filter fitted with outlet connection is to be mounted. These mounts are to be supplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.       I       No         1.3       Factory testing       1       No         The generator should be fully tested at the manufacturer workshop in the presence of client/appointees to check the ratings, overload, functional tests on a dummy load prior to dispatch.       I       No         1.4       Literature and drawings consisting of : (Optional)       I       Lot         • 1 No x Engine operation and maintenance manual       I       Lot         • 1 No x Sengine parts catalogue       1 No x Generator operation and maintenance manual       I         • 1 No x Generator operation and maintenance manual       I       Lot       I         • 1 No x Generator operation and maintenance manual       I       Lot       I         • 1 No x Generator AVR manual       I       Lot       I         • 1 No x Generator AVR manual       I       Lot       I         • 1 No x Generator acture unit manual       1 No x Sengine shall meet the British Standar		welded, drilled on the underside to allow the fitting of foundation bolts. The engine and the alternator are to be mounted on a base plate and vibration mounts to be mounted underside		
iset.       1       No         1.2       Fuel system       1       No         A fuel day tank capacity 4000 liters complete with level indicator, drain plug, filler, fuel return with fuel outlet connections and a fuel filter fitted with outlet connection is to be mounted. These mounts are to be supplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.       1       No         1.3       Factory testing       1       No         The generator should be fully tested at the manufacturer workshop in the presence of client/appointees to check the ratings, overload, functional tests on a dummy load prior to dispatch.       1       No         1.4       Literature and drawings consisting of : (Optional)       1       Lot       1       Lot         • 1 No x Engine parts catalogue       1 No x Engine operation and maintenance manual       1       Lot       1         • 1 No x Generator operation and maintenance manual       1 No x Generator operation and maintenance manual       1       Lot         • 1 No x Second Aff Manual       1       No x Generator Aff Manual       Lot         • 1 No x Engine shop manual       1       No x Generator operation and maintenance manual       Lot         • 1 No x Second Aff Manual       1       No x Generator Aff Manual       Lot         • 1 No x Second Aff Manual       1       Lot       Lot		•		
A fuel day tank capacity 4000 liters complete with level indicator, drain plug, filler, fuel return with fuel outlet connections and a fuel filter fitted with outlet connection is to be mounted. These mounts are to be supplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.         1.3       Factory testing       1       No         The generator should be fully tested at the manufacturer workshop in the presence of client/appointees to check the ratings, overload, functional tests on a dummy load prior to dispatch.       1       No         1.4       Literature and drawings consisting of : (Optional)       1       Lot         • 1 No x Electrical wring diagram       1       No         • 1 No x Electrical wring diagram       1       Lot         • 1 No x Generator parts catalogue       1       No         • 1 No x Generator parts catalogue       1       No         • 1 No x Generator and maintenance manual       1       No         • 1 No x Generator parts catalogue       1       No         • 1 No x Generator and maintenance manual       1       Lot         • 1 No x Generator parts catalogue       1       Lot         • 1 No x Generator and maintenance manual       1       No         • 1 No x Generator parts catalogue       1       Lot         • 1 No x Generator AR manual       1       Lot         •				
with fuel outlet connections and a fuel filter fitted with outlet connection is to be mounted. These mounts are to be supplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.       I       No         1.3       Factory testing       I       No         The generator should be fully tested at the manufacturer workshop in the presence of client/appointees to check the ratings, overload, functional tests on a dummy load prior to dispatch. - Technical data sheet of generator.
- Technical data sheet of Dynamo.
- Data sheet specifying cooling system rated ambient temperature 50 degree.
- > Certificate of Authenticity specifying Assembler or Manufacture.
- > Technical specification of remote Radiator.

#### TECHNICAL SPECIFICATIONS OF W TYPE REMOTE RADIATOR

The cooling equipment consisting W type radiator with heavy-duty structure, suitable for tropical weather, and equipped with vertical air flow fans driven by electric motor .Standard IP55 or IP65 (7.5HP) (ABB or equivalent). With VCD

Cooling circuit and pipe line should be designed for two separate circuits for jacket water and after cooler water of the engine. Primary FCW-140(LT+HT) Secondary FCW-180.

All installation accessories must be BS standard and include seamless pipes, gauges, gate valves, flanges, bolts elbows and expansion tank.

The radiator must be designed and sized to adequately cool CUMMINS KTA50-G8 engine and meet the specs below.

Cores	Tin Coated		
Motor controller	Automatic		
Low Coolant Level Protection	Engine Shutdown		
Air Flow	Vertical		
Ambient Temperature	50C		
Inlet Coolant Temperature	90C		
Outlet Coolant Temperature	84C		
Heat Rejection	676 kW		
Maximum Coolant Friction Head	69 kPa		
Maximum Static Head	18.3m		
Electric Motor	3ph, 400V, 5.6kW		
Motor Starter	Soft Starter		
Motor Protection	IP 54		
Insulation	Class F		
No. of Fans	3		
Noise Level	75dB (A) @ 7m		
Overall Dimensions (L x W x H),	4660 x 2030 x 2495mm		

Cooling water pipe line should be designed to install at 6meters distance from the engine.

Port Complex Building, 7th Floor, Hilaalee Magu, Male, 20207, Maldives
