Job Opportunity

Post	Lead Software Developer	Reference	Tradenet-HR/J/2023/35
Location	Male'		
No of positions	1		
Term of Employment	The duration of the assignment is 1 (one) year from the commencement of work. Contract can be extended after performance analysis at the end of the term.		
Project Background	The National Single Window (NSW) Project introduces an electronic platform streamlining the import and export process by providing a singular access point for all related statutory requirements.		
Remuneration	Based on qualifications and experience		
Qualification & Experience	- Bachelor's degree in computer science, software engineering, or a related field will be an advantage. - Demonstrated expertise in full-stack development, supported by an impressive portfolio of successful projects. - Mastery in front-end technologies including HTML, CSS, JavaScript, and contemporary JavaScript frameworks (e.g., React, Angular, or Vue.js). - In-depth knowledge of back-end technologies, especially Java with a particular emphasis on Spring Boot, supplemented by familiarity with databases (both SQL and NoSQL). - Awareness of international trade regulations and customs requirements pertaining to software development in trade facilitation projects. - Acute analytical and problem-solving skills, paired with an innovative mindset, ensuring the delivery of top-notch solutions. - Collaborative spirit with an emphasis on punctuality and software excellence.		
Responsibilities	- Collaborate with cross-functional teams to interpret requirements, translating them into detailed technical specifications for software development. - Design and develop intuitive front-end interfaces utilizing cutting-edge web technologies, ensuring an exceptional user experience. - Construct and maintain powerful back-end systems, databases, and APIs that enable seamless data processing and application functionality. - Guarantee the scalability, security, and performance of the software solutions through meticulous testing, debugging, and optimization. - Integrate third-party APIs and services as required, broadening the capabilities of the NSW platform. - Engage in code reviews, provide constructive feedback, and uphold the highest standards of coding practices. - Stay abreast of the latest industry trends and advancements, ensuring the continuous enhancement of development approaches.
