## DESIGN GUIDELINES

- The area should always be open and accessible to the public, providing a peaceful and enjoyable space for everyone, including children and disability people.
- Using eco-friendly materials for the façade such as timber for finished, coir rope materials for columns finished and synthetic palm leaves for roofs finishes can enhance the natural aesthetics of the environment, fostering a vibrant connection with the surrounding community.
- At least one waste management bin should be available in the area to ensure proper disposal of trash.
