# Section III. Evaluation Criteria

This Section describes the criteria for determining overall bid scores that rank the bids and identify the Most Economically Advantageous Tender (MEAT).

**Table 1. Evaluation Criteria**

Criteria		Weight
Price	Cost	60%
Experience of the Firm	Related Experience in carrying out External Audits	20%
Qualifications of the Audit Team	Team members qualification as per the eligibility criterias	10%
Duration	Shortest duration to complete an annual audit	10%

## A. Evaluation Model

### 1. Price Evaluation using Lowest Price Model

- 1.1. The price of the bid received is compared to the lowest price obtained and is rated on a descending scale. The lowest priced bid will receive the most price points available.
- 1.1. Higher priced bids receive a lower score according to how much more expensive they are when compared to the lowest priced bid, as computed by the formula below.

$$\text{Price Score} = \frac{\text{Lowest Bid Price} \times \text{Price Weighting}}{\text{Bid Received}}$$

2. The experience of the firm will be measured by counting reference letters and any other form of proof, such as contracts or engagement letters provided. The Bidder with the highest number of acceptable references will receive the highest score. Other Bidders' scores will be prorated based on their reference count relative to the highest.

$$\text{Experience Score} = \frac{\text{No. of Reference Received} \times \text{Experience Weight}}{\text{Maximum Reference Received}}$$

3. Experience of the team will be measured by evaluating the references and CVs of the engagement partner and engagement managers. Full marks will be provided if the eligibility criteria stated in Section IV (4.) is met. Any bidder who does not meet the eligibility criteria will score zero.

4. The Bidder proposing the shortest timeframe to complete the annual audit will receive the highest score. Other Bidders' scores will be prorated based on how their proposed timeframes compare to the shortest.

$$\text{Duration Score} = \frac{\text{Shortest Period Proposed} \times \text{Duration Weight}}{\text{Proposed Duration}}$$
