

# **INFORMATION SHEET for PROCUREMENT of RO PLANT**

**Reference No: FNK-I/IUL/2024/195** 

Issued on: 02<sup>nd</sup> July 2024

Issued by:

Fenaka Corporation Limited Male', Republic of Maldives

# **Section I: Instruction to Bidders**

| A. General                |     |  |  |
|---------------------------|-----|--|--|
| 1. Scope of Bid           | 1.1 | Fenaka Corporation Limited requests quotations for RO Plant in             |  |
|                           |     | accordance with Section III, Technical Specifications                      |  |
|                           | 1.2 | It is in Fenaka Corporation Limited's discretion to cancel this bid        |  |
|                           |     | invitation at any time.  |  |
| 2. Eligible Participants  | 2.1 | Local companies registered in Maldives are eligible to participate in the  |  |
|                           |     | tender   |  |
|                           | 2.2 | Foreign companies are eligible to participate in the tender only if the    |  |
|                           |     | total bid value is above 2,500,000 Maldivian Rufiyaa.                      |  |
| B. Preparation of the Bid |     |  |  |
| 3. Bid Prices             | 3.1 | The unit price of each item and the total price shall be clearly indicated |  |
|                           |     | in the quotation   |  |
|                           | 3.2 | All items shall be quoted in the bid (please refer to Section III,         |  |
|                           |     | Technical Specifications for the details of required items)                |  |
|                           | 3.3 | Quotation shall separately indicate the additional charges such as         |  |
|                           |     | freight charges, insurance, etc.   |  |
|                           | 3.4 | The bidder shall submit quotation on CIF basis to Male' port               |  |
| 4. Currency               | 4.1 | The bidder shall quote entirely in Maldivian Rufiyaa                       |  |
| 5. Alternative Bids       | 5.1 | Bidders can submit a maximum of two (2) options                            |  |
| 6. Validity of Bids       | 6.1 | Quotation shall remain valid for minimum sixty (60) days from the date     |  |
|                           |     | of bid opening   |  |
| 7. Bid Security           | 7.1 | All bids should be accompanied with a bid security of USD 1,000 (One       |  |
|                           |     | Thousand US Dollars) or its equivalent in Maldivian Rufiyaa                |  |
|                           | 7.2 | The bid security should be:  |  |
|                           |     | - Original bank guarantee letter (or)                                      |  |
|                           |     | - Bank guaranteed and stamped check (or)                                   |  |
|                           |     | - An insurance policy from Maldives Monetary Authority (MMA)               |  |
|                           |     | registered insurance company   |  |
| 1                         | 1   |  |  |

## **Section II: Evaluation Criteria**

Proposal Cost: 60 points for the lowest price

- *(Lowest price / proposed price) x 60* 

**Delivery**: 10 points for the lowest delivery period

- (Lowest delivery period / proposed delivery period) x 10
- If the delivery period indicates 'ex-stock', it shall be taken same as the party offering the longest delivery period.

Credit Period: 10 points for the maximum credit period.

- (Proposed credit period / longest credit period) x 10

### Experience: 20 Points

- This company only acknowledges experience letters which proves the pickup have been supplied to Maldives.

**Note:** Any discrepancy in technical details specified in quotation with technical specification document, the specification shall prevail.

## **Section III: Technical Specifications**

| Description   | Quantity |
|---------------|----------|
| RO Plant 150m | 02       |

#### Technical Specification for 150 m<sup>3</sup> of 02 Reverse Osmosis Desalination Plant for Lh. Hinnavaru

#### Scope of Work

The contractor is responsible for providing and installing a fully functional 02 Nos of 150 m<sup>3</sup> reverse osmosis desalination plant in a single skid, encompassing all necessary components and equipment for efficient operation including piping, upgrade of borehole pump(s) (water intake), Prefiltration and RO plants.

#### **Technical Specifications**

- Single RO Plant should be capable of producing minimum 150 m<sup>3</sup>/day based on 20 hours of
  operation per day (7500 l/hr.) It should be compact and easily disassembled for portability
  and recovery rate should not be less than 40%. Furthermore, all items should be incorporated
  in compact SS skid systems. Contractor must provide critical spares for 12 months of operation
  provided and training sessions for staff to effectively operate the new RO Plant(s).
- The contractor holds responsibility for the newly installed RO Plant throughout the Defect Liability Period, lasting for 12 months from the installation date.
- Both RO Plants are to be designed for installation on a single foundation, functioning as a twotrain system, thus limiting the available space in the RO Plant room. The existing foundation measures 3330 millimeters in length, 2032 millimeters in breadth, and has a height of 2743 millimeters in RO Plant Room.
- The contractor is responsible for uninstalling the current RO Plant(s) and installing the new
  plants within a one-week timeframe. The island's water storage is inadequate for a period
  exceeding one week.
- The contractor to provide the following drawings:
  - Process flow + PID Diagrams
  - o General Arrangement Drawings Single Line Electric Diagrams
  - Catalogue for all proposed equipment's
  - o Operation and maintenance manuals (written in English)

| Component                               | Requirement   |  |  |  |
|---|---|--|--|--|
| Feed Water                              | Sea water of TDS 25000-45000ppm is the medium of feedwater.   |  |  |  |
| Borehole Pump                           | Borehole pump to be upgrade for the feed of minimum 37.5 m <sup>3</sup> /hr.<br>Existing borehole diameter is 225mm and the feed is 11.95 m <sup>3</sup> /hr.   |  |  |  |
| Feed Pump                               | Centrifugal pump of corrosion resistant material.   |  |  |  |
| Prefiltration                           | 05- and 10-micron bag or cartridge filters and media filter (sand filter)<br>must provide (spares should be readily available locally).<br>Multimedia Filters, pressure type, FRP or composite construction<br>complete with graded silica sand media, anthracite and gravel<br>support. Filter is supplied with manual or automatic valves actuated<br>electrically<br>Cartridge or Bag filtration system complete with stainless steel<br>housing and filter elements (5 and 10 micron), differential pressure<br>indicator, air relief valve isolation and drain valves and inlet and outlet<br>pressure gauges. |  |  |  |
| Reverse Osmosis<br>membranes and vessel | RO membranes (8") of sufficient quantity and compact vessel size.<br>High pressure inter connection piping shall be of duplex stainless steel.<br>Low pressure piping shall be UPVC.  |  |  |  |
| High pressure pump                      | Duplex SS axial piston pump, and motor sized for the (frequency<br>controlled) production capacity preferred. Preferred brand of HP<br>pump is Danfoss.   |  |  |  |
| Plant backwash/rinse<br>system          | Backwash pump, and HDPE tank or a dichlorination system (<br>chlorination is done) sized for full backwash of the RO plant<br>Automatic flushing system including controls of concentrate by pass<br>solenoid valve.  |  |  |  |
| Low pressure pipes<br>and fittings      | u-PVC (grey) or PP (green) pipes and fittings of minimum PN10.<br>inlets and outlets must be of u-PVC.  |  |  |  |
| Disinfection system                     | Sufficiently sized UV-C system with two light tubes, or chlorination<br>system with pump for disinfection of product water.   |  |  |  |
| Antiscalent Dosing                      | A small amount of antiscalent must be dosed to prevent formation of<br>CaSO4, CaCO3 scale. Chemical tank shall be polyethylene with cover<br>fitted with liquid level gauge and float switch and a pump for dozing.   |  |  |  |
| Chlorine Dosing                         | Chemical tank shall be polyethylene with cover fitted with light fever<br>gauge and float switch and a pump for dozing.   |  |  |  |
