1. DELL HCI additional node with VMware license renewal

Hyper Converged Infrastructure Node with VMware - Minimum Specification	
Form Factor	1U Rack Mountable
Processor	AMD EPYC 2.8GHz 24-core
Memory	256GB RDIMM Memory
Storage	02 x 480GB mixed use SSD boot device
Storage	Storage: 6 x 1.92TB SSD
Storage Controller	Integrated storage controller with battery-backed cache
Power Supply	Redundant hot plug 500W Power Supply
Network	Dual port 10Gb/s SFP+ Network Adapter with 02x 10G uplink cable to Core Switch
PDU	Rack PDU, Switched, 1U, 10A/230V, (8)C13 (horizontal)
Additional Requirements	Installation and Configuration Service
	HCI System Initialization, startup and configuration should be directly from Manufacturer
	Hyperconverge Appliance in a Fully Integrated System
	On Demand Scale-in and Scale-out Architecture
	Must be capable of cluster expansion without downtime
	Always-on deduplication and compression to significantly reduce capacity utilization
	Any software license required to enable deduplication & compression must be included (3 Years)
	Built-in resiliency, backup, and disaster recovery for enterprise-grade data protection
Enterprise Server Remote Management Software License	
	The solution should be resilient and highly available and able to withstand node failures with no loss of hosted workloads
VMware	VMware vSAN licenses as required

	VMware vSphere 7 Standard for total 3 processors
	3 Year subscription and support for all CPUs
Warranty & Support	3-year parts and labor, 3-year onsite support, 3-Year local technical support
