

Job Opportunity

Post	Full-Stack Developer - Consultant	Reference	Tradenet-HR/J/2024/18
No of positions	02		
Employment Type	Consultant		
Duration	The Duration of the assignment is 6 months from the commencement of work. Contract may be extended another 6 months based on the requirement.		
Remuneration	Based on qualification and experience		
Scope of Work	<p>The National Single Window (NSW) Project aims to provide an efficient electronic platform for trade and transport parties to lodge standard information and documents through a single-entry point, fulfilling import and export statutory requirements. Leveraging information and communication technology (ICT), it will streamline international trade procedures between the private sector and border control agencies, facilitating electronic transactions for traders and service providers.</p> <p>The project's outcomes include an electronic platform for streamlined trade processes, sharing harmonized data for automated document processing, and utilizing ICT for online cross-border trade and cargo clearance efficiency.</p>		
Roles and Responsibilities	<ul style="list-style-type: none"> • Integrate software systems and applications within the NSW platform. • Documentation of integration processes, configurations, and troubleshooting guidelines. • Test plans and reports validating the reliability and performance of integration solutions. • Regular updates on integration progress and task completion. • Participate in all stages of the software development lifecycle (SDLC), including requirement gathering, system design, implementation, testing, and deployment. • Ensure that all development is aligned with the architectural guidelines, performance standards, and security protocols set by Tradenet. • Build and maintain RESTful APIs for application integration and data exchange across multiple platforms. 		
Collaborate with Cross-Functional Teams	<ul style="list-style-type: none"> • Work closely with product managers, UX/UI designers, business analysts, and other stakeholders to understand project requirements and user needs. • Provide feedback and insights into technical feasibility during the planning stages of new initiatives. • Collaborate in agile teams, participate in daily stand-ups, sprint planning, and retrospectives. 		
Documentation and Knowledge Sharing	<ul style="list-style-type: none"> • Write clear and concise documentation for codebases, APIs, and system functionalities. • Share knowledge with the team by conducting code reviews, technical training, and mentorship for junior developers. 		
Qualification & Experience	<ul style="list-style-type: none"> • BS or higher in Computer Science or a related field is preferred but optional. Equivalent professional experience is essential. • Proven expertise in integrating diverse software systems and applications, demonstrated through successful integration projects. • Proficiency in various integration technologies and protocols, such as API, REST, SOAP, and message queuing systems. • Strong knowledge and experience in .net development and integration (C# and ASP.NET). 		

Professional Skills	<ul style="list-style-type: none">• Strong problem-solving skills and attention to detail.• Proficiency in agile development methodologies.• Prior experience in developing applications for government entities or reputable companies is a plus.• Ability to work independently and manage multiple projects simultaneously.• Excellent communication and collaboration skills to work effectively in a remote, cross-functional team environment.
