NATIONAL CENTRE FOR INFORMATION TECHNOLOGY

Ref no: (IUL)164-H/1/2019/92

Date: 02nd October 2019

SOFTWARE DEVELOPER

INTRODUCTION
The National Centre for Information Technology (NCIT) wishes to hire energetic, self-motivated, organized and enthusiastic Programmer for e-Service Development Project.

OBJECTIVES
The objective of the programmers is to work as team under NCIT's guidance to provide programming service for the e-Service Development Project.

DURATION
2 years

KEY TASKS AND RESPONSIBILITIES
1. Develop and maintain systems that enable citizens and businesses to apply and pay for Government Services online. The systems enable agencies to track, retrieve and process submissions related to their services. It allows agencies to update the status of the submissions and for the applicant to check the status of their submissions online.
2. Study and understand complex software application systems
3. Development of software application systems
4. Work with end users and internal staff for timely resolution of application issues and develop new software applications/components.
5. Write, revise and maintain software program documentation, operations documentation, and user guides in accordance with standards.
6. Design and manage all phases of testing for assigned components in projects.

MANDATORY REQUIREMENT

- Diploma in Software Engineering/IT and above, or Degree and above in any field or 05 years of application development experience.
- Should have strong knowledge and skills in either PHP, .NET Technologies or Java.
- Understanding of web technologies including JavaScript, HTML5, CSS3 and jQuery
- Should have knowledge of Database systems, either MSSQL Server or MySQL

- Should be able to design, code and develop production level applications independently
- Should be able to use modelling languages such as UML or SSADM for development and documentation.
- Experience with Source Control (Git or TFS)

ADDED ADVANTAGE
- Strong programming background with knowledge in modular based programming and use of emerging trends
- Good graphics skills and knowledge in UI design to improve usability
- Knowledge in full software development cycle including project formulating, version control and maintenance after deployment
- Project Management Skills – Good planning, scheduling, and analytic skills
- Good writing skills in Dhivehi and English

PERSONAL SKILLS & COMPETENCIES
- Strong commitment and willing to work outside normal working hours when required
- Strong interpersonal skills.
- Ability to asses and communicate issues clearly.
- Strong problem-solving skills.
- Attention to detail.
- Strong time management skills.
- Ability to work under pressure and deliver project objectives.

REMUNERATION
MVR, 12,500/-
Performance Allowance: MVR, 2,500/-

CONTENTS OF JOB APPLICATION
The job applications should comprise the following documentation and late submission of any of the documents will not be accepted:
1. Letter requesting for the job,
