GENERAL MEDICAL CONSUMABLES STANDARD

1. INTRODUCTION

These standards form an essential part of the procurement process to ensure the quality, safety, reliability, and efficacy of medical consumables used within the hospital. The purpose of this standard is to establish minimum requirements and specifications for procuring, evaluating, accepting, storing, and using medical consumable items while ensuring patient safety and compliance with internationally recognized standards.

All suppliers shall ensure that the products supplied comply with the requirements stated in this document unless otherwise specified in the tender specifications.

2. GENERAL INFORMATION REQUIRED FOR ITEMS

The following information shall be clearly provided on the product packaging, labeling, or accompanying documentation where applicable:

- Product name and description
- Intended use of the product
- Identification marking
- Model number / Catalogue number
- Manufacturer name
- Manufacturer address and contact details
- Country of origin
- Company logo or trademark
- Reorder number (REF)
- LOT / Batch number
- Serial number (where applicable)
- Date of manufacture
- Expiry date
- Sterilization method (where applicable)
- Instructions for use in English
- Warning or caution statements
- Storage conditions
- Unique Device Identifier (UDI) where applicable
- CE Marking / FDA approval / UKCA or equivalent regulatory authorization where applicable
- Clear, durable, and legible labeling

3. PACKAGING REQUIREMENTS

3.1 General Packaging

- All products shall be supplied in original manufacturer packaging.

- Packaging shall adequately protect the item from damage, contamination, moisture, and environmental exposure during transport and storage.
- Packaging shall remain sealed and intact at the time of delivery.

3.2 Sterile Products

For sterile products:

- Sterile barrier packaging must be intact and undamaged.
- Packaging shall clearly indicate sterilization status and sterilization method.
- Damaged, opened, or compromised sterile packaging shall be rejected.

4. SHELF-LIFE REQUIREMENTS

- At the time of delivery, all consumables shall have a minimum remaining shelf life of:
 - At least 75% of the total shelf life; or
 - Not less than 12 months before expiry,

unless otherwise specified in the tender document.

- Items with short expiry may be accepted only with prior written approval from the hospital.

5. QUALITY REQUIREMENTS

- Items must be manufactured under internationally recognized Quality Management Systems (QMS) such as:
 - ISO 13485
 - Good Manufacturing Practice (GMP)
 - ISO 9001 (where applicable)
 - Or equivalent international standards
- Suppliers shall ensure compliance with all applicable regulatory and safety requirements.
- Products must be free from defects, contamination, and manufacturing faults.

6. REGULATORY COMPLIANCE

Where applicable, medical consumables shall comply with internationally recognized regulatory requirements such as:

- CE Marking
- US FDA Approval / Clearance
- UKCA Marking
- WHO PQS (where applicable)
- Or equivalent recognized regulatory approval

Supporting certificates or declarations may be requested during evaluation or delivery.

7. TRACEABILITY REQUIREMENTS

All products shall be traceable through:

- LOT / Batch numbers
- Manufacturing records
- Expire dates
- Product reference numbers

Suppliers shall cooperate with recall procedures if required.

8. DOCUMENTS REQUIRED FROM SUPPLIERS

Suppliers may be required to submit the following documents during tender evaluation or upon request:

- Product catalogue or brochure
- Technical specifications
- CE/FDA/ISO certificates
- Declaration of conformity
- Manufacturer authorization letter
- Sample submission
- Material Safety Data Sheet (MSDS/SDS) where applicable
- Sterility certificates where applicable

9. LABELING REQUIREMENTS

Labels shall be:

- Clear and legible
- Written in English
- Durable and resistant to fading
- Properly affixed to the packaging

Critical information such as expiry date, LOT number, manufacturer details, and sterilization status shall be mandatory.

10. STORAGE AND TRANSPORTATION

Suppliers shall ensure that:

- Products are transported under suitable conditions.
- Temperature-sensitive items are maintained within recommended temperature ranges.
- Cold chain products are delivered with proper monitoring and documentation where applicable.

11. INSPECTION AND ACCEPTANCE

The hospital reserves the right to:

- Inspect products upon delivery

- Reject items that do not comply with specifications
- Request supporting documentation or samples
- Conduct quality verification checks

Missing non-critical information may be evaluated on a case-by-case basis by the Evaluation Committee, QID, or relevant authority.

12. REJECTION CRITERIA

Products may be rejected if:

- Expired or Near Expiry
- Packaging is damaged or compromised
- Labels are unclear or missing critical information
- Specifications differ from approved tender requirements
- Regulatory or quality requirements are not met
- Delivered products differ from submitted samples or catalogues

13. GENERAL CONDITIONS

- Submission of a quotation implies full compliance with this standard unless clearly stated otherwise by the supplier.
- The hospital reserves the right to request clarification, additional documents, or samples during the evaluation process.
- Compliance with this standard does not exempt suppliers from complying with any additional requirements specified in individual tenders.
