

Job Title:	Data Warehouse Engineer	Work Location:	Greater Malé Region
Division:	Technology	Employment Type:	Full-time
Deadline:	9th June 2026, before 12:00 PM		

Key Responsibilities

- Designing and maintaining blueprints for data warehouses to optimize data storage and query performance.
- Developing and monitoring ETL/ELT processes to cleanly move data from various source systems into the warehouse.
- Implementing validation rules, cleaning data, and establishing protocols to ensure data accuracy, consistency, and security.
- Monitoring system performance, indexing tables, and optimizing complex SQL queries to ensure fast report generation and data retrieval.
- Collaborating with internal stakeholders to understand their data needs and building semantic layers or data marts to support BI tools and reporting.
- Creating and maintaining data dictionaries and documentation so users understand what data is available and how to use it.
- Troubleshooting system bottlenecks, managing user access permissions, and assisting with migrations to cloud data platforms.
- Perform any other duties as may be assigned by the Management.

Minimum Qualifications and Experience

- Bachelor’s degree (MQA Level 7 or 8) in Data Science, Information Systems, Computer Science, Information Technology, Statistics, or a related discipline, with a minimum of three (3) to four (4) years of relevant professional experience;
OR
- Diploma (MQA Level 5 or 6) in Data Science, Information Systems, Computer Science, Information Technology, Statistics, or a related discipline, with a minimum of five (5) to six (6) years of relevant professional experience.
- High proficiency in SQL alongside data modeling architecture, ETL/ELT data pipelines, and cloud data warehouse platforms like Snowflake or BigQuery.

Salary & Benefits

- Remuneration between MVR 23,000 – MVR 24,200 based on qualifications and experience
- Other benefits governed by applicable laws and the Corporation’s policies
