

Requirement

S. No.	Item Description	Quantity
1	Crocodile Forceps ENT (Short)	4 Pieces
2	Crocodile Forceps ENT (Long)	4 Pieces
3	ENT Suction Tips (Size 6 ,8 ,10,12)	15 Each
4	Ear Speculum (Metal)	3 Pieces
5	Foreign Body Removal Instrument Set (ENT)	1 set
6	Alligator Ear Forceps (Hartmann Forceps)	5 pieces
7	Compressed Nasal Packing Sponge (Merocel® Nasal Pack or Equivalent)	200 Pieces
8	External Nasal Splint	10 Pieces
9	Tracheostomy Tubes – Single Lumen (Sizes 5.5, 5.5, 7.0, 7.5, 8.0)	5 Each
10	Tracheostomy Tubes – Double Lumen (Sizes: 5.0, 7.0, 8.0)	5 Each

1. Crocodile Forceps ENT (Short)

- Stainless steel medical-grade construction.
- Fine serrated jaws suitable for ENT procedures.
- Corrosion-resistant and autoclavable.
- Length: Approximately 8–12 cm.

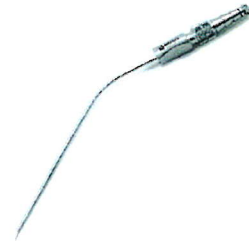

2. Crocodile Forceps ENT (Long)

- Stainless steel medical-grade construction.
- Fine serrated jaws for foreign body removal.
- Corrosion-resistant and autoclavable.
- Length: Approximately 14–18 cm.

3. ENT Suction Tips

- Medical-grade stainless steel.
- Reusable and autoclavable.
- Smooth finish with atraumatic tip.
- Compatible with standard suction tubing.

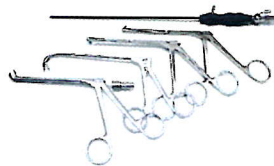

4. Ear Speculum (Metal)

- Stainless steel reusable ear speculum set.
- Multiple sizes included.
- Autoclavable and corrosion-resistant.

5. Foreign Body Removal Instrument Set (ENT)

- Complete set for ear, nose, and throat foreign body removal.
- Stainless steel instruments.
- Reusable and autoclavable.
- Supplied in a storage case.

6. Hartmann Forceps

- Stainless steel construction.
- Serrated jaws for secure grasping.
- Reusable and autoclavable.
- Length: Approximately 8–12 cm.

9. Compressed Nasal Packing Sponge (Merocel® Nasal Pack or Equivalent)

- Compressed polyvinyl acetate sponge.
- Sterile, individually packed.
- Rapid expansion upon hydration.
- Suitable for epistaxis control and postoperative nasal packing.

10. External Nasal Splint

- Thermoplastic or aluminum foam-coated material.
- Moldable and lightweight.
- Suitable for postoperative nasal support.
- Sterile or single-use.

12. Tracheostomy Tubes – Single Lumen

- Medical-grade PVC or silicone.
- Sterile and individually packed.
- Radiopaque line for X-ray visualization.
- Standard 15 mm connector.
- Disposable.

13. Tracheostomy Tubes – Double Lumen

- Medical-grade PVC or silicone.
- Inner cannula removable for cleaning.
- Sterile and individually packed.
- Radiopaque line.
- Standard 15 mm connector.
- Disposable

General Requirements

- All reusable instruments shall be made of high-quality medical-grade stainless steel.
- All reusable instruments shall be fully autoclavable.
- Products should comply with applicable international standards such as CE Marking and/or US FDA approval.
- Manufacturer should provide product catalogues and technical datasheets with the bid.
- Consumables should have a minimum shelf life of 75% remaining at the time of delivery.
