DEFINITIONS

Essential Medicines	Essential medicines are medicines that satisfy the priority healthcare needs of the population. They are selected based on public health relevance, evidence of efficacy and safety, quality, and cost-effectiveness, and are intended to be continuously available within the healthcare system in appropriate dosage forms, assured quality, and adequate quantities.
Grade-1 Pharmacy	A Grade-1 Pharmacy is any registered pharmacy that is not situated within the premises of a hospital. These pharmacies provide pharmaceutical services primarily to meet the routine healthcare needs of the general population and are required to maintain the medicines specified in the Grade 1 Pharmacy Essential Medicines List
Grade-2 Pharmacy	A Grade-2 Pharmacy is any registered pharmacy that is situated within the premises of a hospital supporting secondary and tertiary health care needs. These pharmacies support specialist clinical services and are required to maintain the medicines specified in the Grade 2 Pharmacy Essential Medicines List
Grade 1 Pharmacy Essential Medicines List	It is the list of medicines designated as the minimum essential medicines required to be maintained by all registered Grade 1 pharmacies. These medicines are intended to support the management of common acute illnesses, chronic diseases, primary healthcare conditions, and preventive and supportive care. The list of medicines in this list is mandatory to be kept in all Grade-1 Pharmacies and shall be available at all times with the minimum stock quantity as defined in this document. (Refer to ANNEX 1)
Grade 2 Pharmacy Essential Medicines List	It is the list of essential medicines required to support secondary and tertiary healthcare services. The Grade 2 pharmacy essential medicine list includes all medicines contained in the Grade 1 Essential Medicines List together with additional medicines required for specialist care, inpatient and outpatient hospital services, emergency care, critical care, and the management of more complex medical conditions. The list of medicines in this list is mandatory to be kept in all Grade-2 Pharmacies and shall be available at all times with the minimum stock quantity as defined in this document. (Refer to ANNEX 2).
Minimum Stock Quantity	Minimum stock quantity refers to the minimum quantity of each required essential medicine that should be maintained to meet the pharmacy's anticipated demand for at least one (1) month, based on consumption patterns and service requirements.

Prescription Only Medicine (POM)	A Prescription Only Medicine (POM) is a medicine that may only be supplied upon the prescription of an authorized prescriber in accordance with applicable medicines legislation and regulatory requirements.
Over-the-Counter (OTC) Medicine	An Over-the-Counter (OTC) medicine is a medicine that has been approved by the relevant regulatory authority for supply without a prescription, subject to the applicable conditions of sale.
Good Pharmacy Practice (GPP)	Good Pharmacy Practice (GPP) refers to the standards and professional practices that ensure medicines are procured, stored, handled, dispensed, and supplied in a manner that maintains their quality, safety, and efficacy while promoting the rational use of medicines.
Anticipated Demand	Means the average quantity of a medicine dispensed or supplied by the pharmacy over a period of time. All registered pharmacies shall maintain data and calculated average quantity of medicine dispensed over a three (3) month period.

1 Introduction

To ensure the continuous availability, accessibility, and rational use of essential medicines throughout the healthcare system, pharmacies shall be categorized into two levels based on the scope of pharmaceutical services they provide and the level of healthcare facility they support.

The minimum essential medicines required for each category of pharmacy are specified in the Grade 1 pharmacy Essential Medicines Lists and Grade 2 pharmacy Essential Medicines List. Pharmacies shall maintain the applicable essential medicines in accordance with their designated pharmacy grade to ensure continuous access for patients.

2 Purpose

The purpose of this guideline is to establish a standardized approach for maintaining the minimum required essential medicines in registered pharmacies, in order to ensure continuous public access to safe, effective, quality-assured, and necessary medicines.

3 Scope

This guideline provides guidance for understanding essential medicines list and how minimum requirement from the essential medicines shall be maintained by all registered pharmacies.

4 Roles and Responsibilities

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 6 of 14

MFDA	• Develop, approve and publish Essential Medicines List every two years • Approve and publish list of mandatory essential medicines required to be kept in all pharmacies • Notify all pharmacies of any changes to the lists • Provide guidance on the maintenance of minimum requirement of EML • Monitor pharmacies for maintenance of this requirement of essential medicines • Take appropriate regulatory action in cases of non-compliance and failure to maintain minimum required quantity
Pharmacy Owners	• Maintain minimum required quantity of mandatory essential medicines according to the assigned grade for the registered pharmacy • Ensure systems are implemented for maintaining continuous stock, procurement, tracking expiry and damaged products. • Ensure all personnel are qualified and trained in the concept and implementation of essential medicines list. • Provide support during emergencies, recall or public health events. • Report shortages, supply risks, quality defects, and other medicine availability concerns to MFDA in a timely manner.
Importers	• Ensure imported medicines are quality-assured and obtained from approved or reliable sources. • Maintain proper storage and transport conditions throughout the supply chain, including cold chain where applicable.
State-Owned Pharmacies	• Maintain adequate stock for public needs in accordance with the essential medicines lists including controlled medicines. • Coordinate with MFDA and relevant authorities to minimize drug shortages and provide support during emergencies, recall or public health events. • Report shortages, supply risks, quality defects, and other medicine availability concerns to MFDA in a timely manner. • Support public access to safe, quality and efficacious essential medicines.

Pharmacists	• Ensure systems for storage and management of stock is implemented accordingly with standards established by the pharmacy and MFDA. • Maintain accurate stock records, track expiry and damaged medicines, recalls and shortages.
--------------------	---

5 Classification of Pharmacies

5.1 Pharmacies shall be classified by the Maldives Food and Drug Authority (MFDA) according to the level of healthcare services they support.

5.2 This classification system is intended to ensure equitable access to essential medicines across all levels of healthcare, promote rational medicine use, strengthen medicine supply systems, and ensure that pharmacies maintain an appropriate range of medicines consistent with the level of care they provide.

A) Grade-1 Pharmacy: Grade-1 Pharmacy include all registered pharmacies operating within the country, except those designated as Grade-2 Pharmacy.

These pharmacies are expected to provide essential medicines required to meet the routine healthcare needs of the general population and support primary healthcare services.

➤ Scope of Service

The Grade-1 Essential Medicines List intended to support, but not limited to, the management of:

- Common acute illnesses
- Chronic diseases
- Primary healthcare conditions
- Preventive and supportive care

➤ **Essential Medicine Requirements:** Grade-1 pharmacies shall maintain a minimum stock availability of 80% of the medicines included in the Grade-1 Essential Medicines List. A minimum stock quantity sufficient to meet approximately one month's anticipated demand for each required medicine shall be available at all times.

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 8 of 14

B) Grade-2 Pharmacy: Grade-2 Pharmacy are pharmacies located within the premises of hospitals providing secondary or tertiary healthcare services.

These pharmacies support the medicine requirements of specialist services, inpatient and outpatient care, and the management of more complex medical conditions.

➤ **Scope of service**

The Grade-2 list includes medicines commonly required for, but not limited to, the following:

- Specialist clinical services
- Inpatient and outpatient hospital care
- Advanced disease management
- Emergency and critical care services

- **Essential Medicine Requirements:** Grade-2 Pharmacy shall maintain a minimum stock availability of 80% of the all medicines included in the Grade-2 Pharmacy Essential Medicines List. A minimum stock quantity sufficient to meet approximately one month's anticipated demand for each required medicine shall be available at all times.

Grade-2 Pharmacy Essential Medicines List consists of:

- All medicines in the Grade-1 Pharmacy Essential Medicines List
- Additional medicines required to support secondary and tertiary healthcare services.

C) Grade- 3 Pharmacy: A Grade- 3 Pharmacy is a pharmacy established within a healthcare facility that provides a single specialized healthcare service, such as an eye clinic or hospital, dental clinic, fertility clinic, or any other specialty care facility. Such pharmacies shall maintain an adequate stock of the essential medicines from the Essential Medicines List (EML) that are necessary for the diagnosis, treatment, and management of conditions within the scope of the specialized services provided. The mandatory essential medicines required for each Grade 3 Pharmacy shall be determined and approved by the Maldives Food and Drug Authority (MFDA) on a **case-by-case basis**, based on the type of services offered, patient care requirements, and applicable standards of practice.

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 9 of 14

6 Relationship Between the Grade-1, Grade-2 pharmacy Essential Medicines Lists

- 6.1** The Grade-2 Essential Medicines List includes all medicines contained in the Grade-1 Essential Medicines List together with additional medicines required to support secondary and tertiary healthcare services.

Pharmacy Level	Essential Medicines Required
Grade-1 Pharmacy	Medicines listed in the Grade-1 Essential Medicines List
Grade-2 Pharmacy	Grade-2 Essential Medicines List which includes all medicines included in the Grade-1 Essential Medicines List together with the additional medicines to cater the secondary and tertiary health care service
Grade-3 pharmacy	Essential medicines determined by MFDA on case-by-case basis

7 Availability of Other Medicines

The designation of essential medicines establishes the minimum medicines that must be available within each category of pharmacy. It does not restrict pharmacies from stocking additional medicines.

Provided they comply with all applicable regulatory requirements, pharmacies may stock:

- Registered and approved Prescription Only Medicines (POM)
- Registered and Approved Over-the-Counter (OTC) medicines
- Other registered medicines, including medicines appropriate for the level of care provided and approved nutraceuticals.

8 Compliance Requirements

8.1 Existing Pharmacies

- 8.1.1** Pharmacies that hold a valid operating license on the date these requirements come into effect will be given a transition period of six (6) months to comply with the applicable Essential Medicines List requirements.

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 10 of 14

- 8.1.2** Maldives Food and Drug Authority (MFDA) will determine the pharmacy grade (Grade-1 or Grade-2) and inform the pharmacies. Based on the assigned grade, MFDA will also provide the list of essential medicines that the pharmacy is mandated to keep and maintain with the minimum quantity to be kept.
- 8.1.3** During this six-month period, pharmacies shall review their current medicine inventory and ensure that they meet the minimum stocking requirements for their assigned pharmacy grade.
- 8.1.4** At the end of the transition period, pharmacies shall comply with the applicable Essential Medicines List requirements as a condition of maintaining their operating license.
- 8.1.5** Failure to comply after the six-month transition period may result in regulatory action in accordance with the applicable laws, regulations, and licensing requirements.

8.2 New Pharmacies

- 8.2.1** For newly registered pharmacies, the **Maldives Food and Drug Authority (MFDA)** will determine the pharmacy grade (Grade-1 or Grade-2) during the registration process. Based on the assigned grade, MFDA will provide the list of essential medicines that the pharmacy is mandated to keep and maintain with the minimum quantity to be kept.
- 8.2.2** Operating license shall only be issued after the pharmacy has demonstrated compliance with the applicable Essential Medicines List requirements.
- 8.2.3** Pharmacies that meet these minimum stocking requirements will be eligible for the issuance of an operating license.
- 8.2.4** Pharmacies applying for renewal shall follow these same criteria as for new pharmacies. Renewed operating license will only be issued once the requirements are fulfilled for all criteria applicable to keep essential medicines in the pharmacy.

8.3 Assessment of Compliance

- 8.3.1 Stock Availability:** Stock availability refers to the proportion of medicines from the applicable Essential Medicines List that are physically available within the pharmacy at any given time.
- 8.3.2** For the purposes of this guideline, a medicine shall be considered available if:

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 11 of 14

- Medicine corresponding to the listed medicine, dosage form, and strength is physically present in the pharmacy;
- The product is within its expiry date;
- The quantity available is sufficient to meet at least one month's anticipated demand based on the pharmacy's dispensing records or projected utilization; and
- The medicine is available for immediate dispensing to patients.

8.3.3 A pharmacy shall maintain at least than 80% of the medicines included in the applicable Essential Medicines List at all times. Compliance with the minimum stock availability requirement shall be assessed using the following formula:

Stock Availability (%) = (Number of essential medicines that comply with the minimum stock requirement ÷ Total number of medicines applicable to the pharmacy level) × 100

Example:

If the Grade-1 Essential Medicines List contains 250 medicines, the pharmacy shall maintain at least:

$250 \times 80\% = \mathbf{200 \text{ medicines}}$

A medicine shall be considered compliant if it:

- be physically present during inspection;
- match the required dosage form and strength;
- be within its expiry date; and
- have a minimum stock quantity sufficient for one month's anticipated demand.

Medicines that are out of stock, expired, unavailable in the required dosage form or strength, or stocked below the required minimum quantity shall be considered **non-compliant** for the purpose of calculating stock availability.

8.4 Determining the 1-month anticipated demand for existing pharmacies:

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 12 of 14

- 8.4.1** One month's anticipated demand = Total quantity dispensed during the previous 3 months ÷ 3.
- This formula we can use for the existing pharmacies in order to determine the 1-month anticipated demand and this quantity of that specific medicine shall be present in the pharmacy at all times

Example:

Medicine	Quantity dispensed in last 3 months	One month's anticipated demand
Paracetamol 500 mg tablets	900 tablets	300 tablets
Amoxicillin 500 mg capsules	450 capsules	150 capsules
Salbutamol inhalers	30 inhalers	10 inhalers

- 8.4.2** This method is objective and easy to verify from dispensing records or sales reports.

8.5 Determining the 1-month anticipated demand for new pharmacies:

- 8.5.1** For newly established pharmacies with no dispensing history, the minimum stock quantity shall be determined based on the expected patient demand, scope of services, and any additional direction issued by MFDA. Once the pharmacy has been in operation for three months, anticipated demand shall be calculated using the pharmacy's dispensing records.

- 8.5.2** MFDA shall determine the minimum quantity for all dosage forms for all new pharmacies to further guide the pharmacies. This minimum quantity shall always be maintained in the pharmacies until the 1-month anticipated demand for the medicines is determined after 3 months.

- For all oral solid dosage forms: 3 commercial packs
- For all oral liquid dosage forms: 5 units
- For all topical forms: 5 units
- Parenteral: 5 units

Medicine and Therapeutic Goods Division, Maldives Food and Drug Authority		Document Created on: 19.07.2026	
Doc. No: MTG/RE-EM/GLN-TE 025	Doc. Name Guideline on Minimum Requirement of Essential Medicines in Pharmacies		
Version No: 01	Issued Date: 19.07.2026	Copy Letter:	Page No: Page 13 of 14

9 Regulatory Action for Non-Compliance

- 9.1.1** At least 80% of the essential medicines mandated to be available for the specific grade of pharmacies shall be available at all times in a quantity to cater the population and disease burden of the location of the pharmacy. The available quantity is measured as mentioned above in point 8.3.3.
- 9.1.2** Failure to maintain the minimum requirements may result in suspension of the operating license for a period of fourteen (14) working days. The operating license may be reinstated once the pharmacy has demonstrated compliance with the applicable Essential Medicines List requirements.

10 Summary

- 10.1.1** All registered pharmacies shall be classified as **Grade-1 pharmacies**, or **Grade-2 pharmacies**.
- 10.1.2** Grade-1 pharmacies shall maintain **at least 80% availability** of the medicines included in the **Grade-1 Essential Medicines List**.
- 10.1.3** Grade-2 Pharmacy shall maintain **at least 80% availability** of the medicines included in the **Grade-2 Essential Medicines List**, which includes all A-Level essential medicines together with additional medicines required for secondary and tertiary healthcare services.
- 10.1.4** The Essential Medicines Lists establish the minimum medicine availability requirements and do not prevent pharmacies from stocking additional registered POM or OTC medicines.
- 10.1.5** Failure to comply may result in regulatory action by MFDA.

11 Legal Basis

1. Medicine Regulation R-46/2014
2. 1st Amendment to Medicine Regulation R-49/2016
