Male', Republic of Maldives

digital economy, and digital society through the establishment of a unified government technology stack, interoperable open data platform, national digital identity system, and secure service delivery frameworks. It will develop national ICT standards, policies, and governance mechanisms to ensure secure, resilient, and citizen-centric digital services across government. Key investments include the Sovereign National Cloud, National Data Center enhancement, and disaster recovery capabilities to safeguard critical government systems. The initiative also promotes transparency, interoperability, innovation, and public and private-sector collaboration while supporting ICT industry growth, emerging technology adoption, capacity building, and international expansion of Maldivian technology services, positioning the Maldives as a regional leader in digital transformation and innovation

Objectives

The Maldives Digital Service (MDS) intends to recruit a **Principle National Information Technology Engineer** to support the implementation of the organization's mandate and the Maldives 2.0 digital transformation initiatives. The selected candidate will be responsible for implementing, managing, and supporting DevOps processes and tools across our development and operational teams.

Key Responsibilities

The Key responsibilities of the **Principle National Information Technology Engineer** include, but is not limited to the following:

1. Support the design, implementation, maintenance, and improvement of secure, scalable, and reliable infrastructure environments supporting digital services.
2. Support the implementation of DevOps practices, including automation, continuous integration and deployment (CI/CD), configuration management, and improvement of operational processes.
3. Assist in managing and maintaining cloud, virtualized, containerized, and other technology environments to ensure availability and performance of digital services.
4. Support the development, maintenance, and improvement of deployment processes, automation workflows, and operational tools.
5. Implement and maintain monitoring, logging, and alerting solutions to support system availability, performance monitoring, troubleshooting, and incident management.

Maldives Digital Service

Male', Republic of Maldives

6. Develop and maintain scripts, automation solutions, and tools to improve efficiency, consistency, and reliability of technology operations.
7. Collaborate with development, cybersecurity, infrastructure, and operations teams to ensure successful delivery, deployment, and operation of digital services.
8. Participate in system optimization, troubleshooting, security improvements, and continuous improvement initiatives across technology platforms.
9. Maintain technical documentation, operational procedures, and system records in accordance with established standards.
10. Continuously develop technical skills, explore emerging technologies, and contribute to the adoption of improved tools, practices, and solutions to support MDS digital transformation objectives.
