# TERMS OF REFERENCE FOR CONSULTANCY SERVICES

to

# Design an air quality monitoring programme for Regional Urban Development Centres

Issued by:

Ministry of Environment Green Building, Handhuvaree Hingun, Maafannu, Male'-20392 Republic of Maldives

## **TERMS OF REFERENCE**

## BACKGROUND

One of the key targets of the draft Maldives National Spatial Plan is to establish an Integrated National Transportation Network across the archipelago, and relevant works are well underway. Commute-level transportation links are planned, in order to enable the resident population to collectively benefit from the day-to-day services and job opportunities within the cluster. These population clusters, support small groups of islands to form higher communities and function collectively.

This is anticipated to result in a surge of marine transport and construction across the archipelago. According to the National Action Plan on Air Pollutants (2019), the second largest source of primary fine particulate matter was emitted from the transport sector, with 65% contributed from marine transport. Fine particulate matter is extremely harmful to human health at high levels of short-term exposure, and even from prolonged exposure at low concentrations.

Therefore, in order to reduce the risks of air emissions on human health and the environment, and address the challenges; the Government of Maldives has planned important interventions to manage air quality (AQ), especially in urban areas across the archipelago.

Monitoring is only a single aspect of AQ management; and while the Maldives does not conduct routine monitoring of local air quality, it has been active in shepherding international action for climate change, itself committing to and taking action that has positive impacts for both climate mitigation, adaptation and AQ.

AQ measurements provide information on the nature of the pollution and on the temporal, spatial variation of concentrations and insight into the contributing sources. This information may be used to develop environmental policy and legislation.

However, the design of an air pollution monitoring network should not be undertaken without consideration and resolution of several factors. Extensive planning needs to be done before requirements are firmly established and translated into hardware specifications.

### **OBJECTIVES**

In this regard, the Ministry of Environment is seeking a national and/or international consultant(s) or a firm to design an Air Quality Monitoring Network (AQMN) for Regional Urban Development Centres. The development of AQMN includes determining the number and location of sampling sites, selecting appropriate instrumentation, determining frequency of sampling, and establishing instrument siting criteria.

### SCOPE AND DELIVERABLES

In close collaboration with the MoEn and relevant stakeholders as necessary provision of technical support for the tasks listed below

- Collect and interpret data for a dispersion model
- Conduct preliminary meetings with relevant stakeholders and agencies, and conduct site visits as necessary
- Identify and propose the most suitable approach for AQ monitoring for Regional Urban Development Centres identified with MoEn

	Deliverable	Scope	% of payment	Duration
1	<u>A screening</u> <u>study</u>	<ol> <li>An initial <u>screening study</u> using simple measurement instruments or simple dispersion models, which estimates the:         <ul> <li>magnitude and variation of pollutant concentrations</li> <li>availability of supplementary information such as topographical data, population density and spatial distribution, background concentrations, air quality standards or guidelines, sources, emission estimates, wind speed and direction distribution, dispersion modelling capacity, and others;</li> <li>required accuracy of the estimated concentrations.</li> </ul> </li> <li>The estimates will give some information on the expected air pollution levels, high impacted areas and general air pollution background levels.</li> </ol>		1.5 months
2	An <u>air</u> <u>quality</u> <u>monitoring</u> <u>programme</u> ( <u>AQMP</u> )	<ul> <li>2. Based on the results of the screening study develop an <u>air quality monitoring programme (AQMP)</u> which address the following areas in detail for the for Regional Urban Development Centres: <ul> <li>Spatial density and number of sampling stations required</li> <li>selection of monitoring sites</li> <li>Parameters to be monitored</li> <li>layout and instrumentation of monitoring stations</li> <li>requirements for additional laboratory facilities</li> <li>Measurement techniques</li> <li>Configuration of sensors and stations</li> <li>Sampling requirements (eg: frequency, time, number of samples)</li> <li>network organization, staff requirements and training demands</li> <li>operation, maintenance and repair</li> <li>How the data shall be accessed, processed, used, communicated and managed</li> <li>Quality Assurance/Quality Control plan for</li> </ul> </li> </ul>	50%	3 months

#### Design an air quality monitoring programme for Regional Urban Development Centres

		the data - Justification for online/ automated data collection systems vs manual sampling or a hybrid network		
3	A <u>procurement</u> <u>package</u>	Prepare a procurement package/ set of documentsreferring to deliverable 2 which ensures standardizationof the bid process to supply, install and operate an AQMsystem in the in Regional Urban Development Centres. Itmust include thei.Administrative and tender documentsii.Technical specifications and scheduleiii.Drawings and layouts	20%	0.5 months

#### **PAYMENT SCHEDULE**

The payment will be released as follows

- a) 30% on timely submission and approval of the screening study
- b) 50% on timely submission and approval of the air quality monitoring programme
- c) 20% on timely submission and approval of the procurement package

#### CHECK-LIST OF DOCUMENTS TO SUBMIT

- ID card copies (or passport copies if international) of all individuals
- A tentative work plan (which breaks down the activities within the stipulated timeframes given in the table above. Expected commencement date of the consultancy is between 15-30 March 2021 and duration of the consultancy is 5 months from the commencement of the contract)
- Financial proposal with a validity of 90 days (proposed fee must include all travel expenses associated with the assignment and the consultancy fees)
- CVs of all individuals and/or company profile if a firm is applying.
- *\*In case an international bidder is applying*: submit a Letter of Association with the proposal. Contract may only be awarded to the successful applicant if a Joint Venture Agreement is submitted after selection.
- Attested copies of higher degree certificate and transcripts
- Letters of experience
- Any other documents which supports the application

#### \*Joint Venture

In case a Bidder is not doing business within the Republic of Maldives, the international Bidder is obligated to undertake a joint venture with a registered local business. The contract can only be awarded if the Bidder is represented by a registered local business in the Maldives that is equipped and able to represent the Bidder and engage at a decision-making level.

## QUALIFICATIONS AND EXPERIENCE

			Weightage (points)	Max points	Documents evaluated
1.Relevant academic	1	Minimum Bachelor's degree or an equivalent qualification related to Environmental Engineering, Atmospheric Science, Environmental Science or other related field with a focus on course modules or research related to air pollution monitoring	25	30	based on relevancy of copies of the attested higher degree certificate and transcript
qualification		Master's degree or an equivalent qualification related to Environmental Engineering, Atmospheric Science, Environmental Science or other related field with a focus on course modules or research related to air pollution monitoring	30		
	2.1	Demonstrated professional or			based on
		educational practical exposure to air quality monitoring	25		letters of experience and/or details of course modules in the transcript, or research paper etc.
		No demonstrated professional or educational practical exposure to air quality monitoring	0	25	
	2.2	Knowledge of international technologies for air pollution control	10		based on letters of
2.Relevant experience		No demonstrated knowledge of international technologies for air pollution control	0	10	experience and/or details of course modules in the transcript, or research paper etc.
	2.3	Work experience in areas relevant to air quality management or monitoring	5 pts for each year	20	based on letters of experience
	2.4	Any experience in working on air quality monitoring or AQ management in developing countries or Small Island Developing States	5 pts if condition is met	5	based on letters of experience
	2.5	A work plan is proposed	5		
	descriptions of all	The proposed work plan has descriptions of all activities, actionable steps and methodologies of analyses.	10	10	based on proposed work plan
				T	
Total		( <i>Minimum technical score required to</i> 65/100)	pass:	100	

Applicants achieving the highest combined weighted technical and financial score shall be selected

- Sf = 100 x Fm/F, in which
- Sf denotes the financial score of the proposal under consideration;
- Fm is the price of the lowest price proposal;
- F denotes the price of the proposal under consideration.

Proposals will be ranked according to their combined technical (St) and financial (Sf) scores using the weights

T% = the weight given to the Technical Proposal (60%) P% = the weight given to the Financial Proposal; (40%)

S = St x T% + Sf x P%,

Where S denotes the total combined weighted technical and financial scores

#### SCHEDULE FOR THE ASSIGNMENT

Duration of the assignment is 5 months from the commencement of the works.

#### **Duty Station:**

Home-based

Appendix 1A - Consultant's Information Form

[The Consultant shall fill in this Form in accordance with the instructions indicated below. No alterations to its format shall be permitted and no substitutions shall be accepted.] Date: [insert date (as day, month and year) of Proposal Submission] Procurement Reference No.: [insert reference number]

Page \_\_\_\_\_ of \_\_\_\_ pages

1 uge 01 puges			
1. Bidder's Legal Name	{insert Bidder's legal name}		
2. In case of JV, legal name of each	{insert legal name of each party in JV}		
party:			
3. Bidder's actual or intended	{insert actual or intended Country of Registration}		
Country of Registration:			
4. Bidder's Year of Registration:	{insert Bidder's year of registration}		
5. Bidder's Legal Address in Country	{insert Bidder's legal address in country of registration}		
of Registration:			
6. Bidder's Authorized Representative Information
