

Video conferencing system

Warranty: 1 year (minimum)

Camera Type: Digital

Video resolution: 1080

Additional Information:

Audio and video recording for all meetings, conferences or any other using the setup being provided.

Video conferencing system required for a meeting room with a rectangular shaped meeting table with dimensions:

4 feet – width

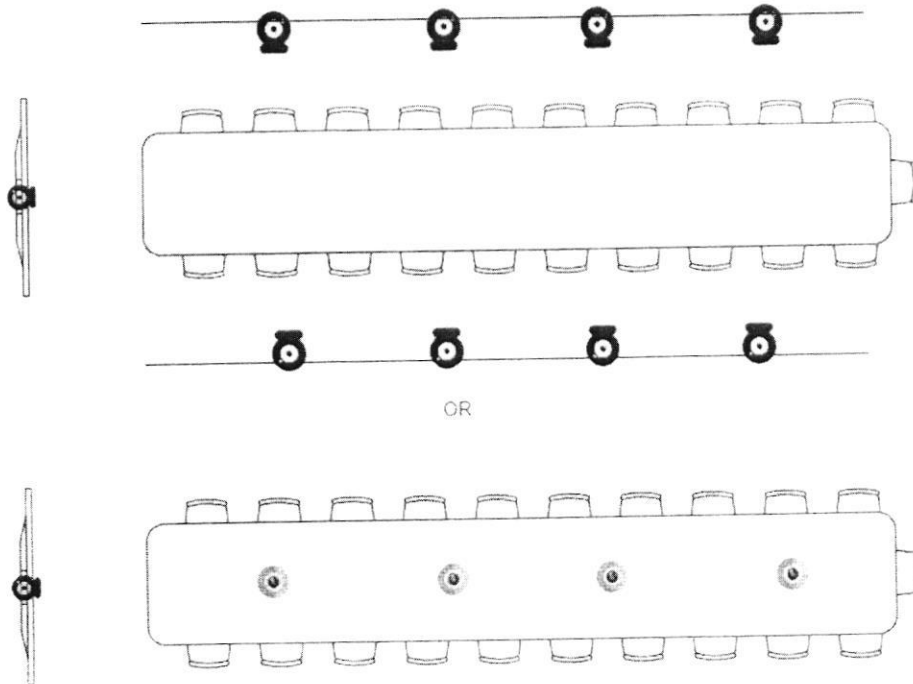

30 feet – length

Conferencing system should pick up sound from all the participants around the table and be able to cover each and every participant separately. To achieve this a separate camera and mic may be installed for every participant (20 participants) or can install multiple cameras which can turn towards to participant speaking.

Speakers maybe installed separately away from the meeting table in setup area. Video and audio output must be available such that the feed can be used to input into computer.

A camera should also be there to cover all the participants.

Sample expectations:

System should be compatible with video calls through the following services and video and audio output available for feeding to computer.

- Google meet
- Zoom video call
- Microsoft Teams
- Cisco webex

And other digital meeting platforms with video and audio.
