

Consultant Software Developer

Post	Software Developer	Reference	TradeNet-CS/J/2021/27
Employment Type	Consultant		
Term of Employment	Duration of the assignment is 6 (six) months from the commencement of the work.		
No of positions	01		
Remuneration	Based on qualification and experience		
Introduction	<p>To strengthen the overall mechanisms to manage the services provided to the public from MED, the Ministry has decided to develop and enhance the existing systems of MED.</p> <p>Initial assessments of the existing systems reveal that a number of processes can be further streamlined while minimizing the use of physical documents and improving the service delivery, and new systems are required to further enhance additional service delivery. Additionally, to migrate to and implement revised policies, substantial changes need to be made to the existing systems. It was also identified that system gaps prevent MED as the service provider and regulator to track compliance of employers and to measure its service performance on a timely basis. Furthermore, some of the modules of the existing systems are not fully online, requiring manual data entry by staff leading to in-efficiencies in services delivery while lack of in-built smart features within the system neither empower user to monitor compliance level nor does it notify users of outstanding obligations in relation to their requests. Feedback received from both internal and external users indicate that the systems require changes to make it smarter and more user-friendly.</p>		
Scope of Work	<p>With the overall guidance and direction from MED, the consultant is required to develop, enhance and maintain the systems related to Inspections, Business Registration Services and Employment Registration Services provided to the public from MED.</p> <p>In developing and enhancing the systems, the consultant should recommend design methods to improve user friendliness, system performance and versatility of the systems developed and enhanced. The consultant is also encouraged to make recommendations on improving the process flows.</p>		
Qualification & Experience	<ul style="list-style-type: none"> • 5+ years of hands-on experience. • Bachelor's Degree in Information Technology or equivalent. • Able to understand complex business processes. • Having worked actively in building applications for the government will be an added advantage. • Experience with agile development methodologies; • Experience in Laravel, MySQL, PHP, and related technology development; • Effective time management skills and ability to meet deadlines; 		

Responsibilities	<p>In developing and enhancing the systems, the consultant shall give due consideration to the following aspects.</p> <ul style="list-style-type: none">• Researching, designing, implementing, and managing software programs• Testing and evaluating new programs• Identifying areas for modification in existing programs and subsequently developing these modifications• Writing and implementing efficient code• Determining operational practicality• Developing quality assurance procedures• Deploying software tools, processes, and metrics• Maintaining and upgrading existing systems• Training users• Working closely with other developers, UI/UX designers, business systems analysts
