

## Consultant UI UX Designer

<b>Post</b>	UI UX Designer	<b>Reference</b>	TradeNet-CS/J/2021/37
<b>Employment Type</b>	Consultant		
<b>Term of Employment</b>	Duration of the assignment is 6 (six) months from the commencement of the work. Contract extension based on performance and need.		
<b>No of positions</b>	02		
<b>Remuneration</b>	Based on qualification and experience		
<b>Introduction</b>	<p>To strengthen the overall mechanisms to manage the services provided to the public from the Government, TradeNet is working to enhance the existing government systems.</p> <p>Initial assessments of the existing systems reveal that a number of processes can be further streamlined while minimizing the use of physical documents and improving the service delivery, and new systems are required to further enhance additional service delivery. Additionally, to migrate to and implement revised policies, substantial changes need to be made to the existing systems. Furthermore, some of the modules of the existing systems are not fully online, requiring manual data entry by staff leading to in-efficiencies in services delivery while lack of in-built smart features within the system neither empower user to monitor compliance level nor does it notify users of outstanding obligations in relation to their requests. Feedback received from both internal and external users indicate that the systems require changes to make it smarter and more user-friendly.</p>		
<b>Scope of Work</b>	<p>With the overall guidance and direction from the Ministry of Economic Development, the consultant will be responsible for delivering the best online user experience, ensuring user satisfaction by gathering user requirements, designing graphic elements and building navigation components. You will be designing ideas using various methods and latest technologies.</p> <p>In developing and enhancing the systems, the consultant shall give due consideration to the following aspects.</p> <ul style="list-style-type: none"> <li>• Researching, designing, implementing, and managing software programs</li> <li>• Testing and evaluating new programs</li> <li>• Identifying areas for modification in existing programs and subsequently developing these modifications</li> <li>• Writing and implementing efficient code</li> <li>• Determining operational practicality</li> <li>• Developing quality assurance procedures</li> <li>• Deploying software tools, processes, and metrics</li> <li>• Maintaining and upgrading existing systems</li> <li>• Training users</li> <li>• Working closely with other developers, UI/UX designers, business systems analysts</li> </ul>		

<b>Experience / Skills / Qualification Requirements</b>	The UI/UX Designer should have a degree in Design, Software Engineering or related field with minimum of 3 years of experience, have a good knowledge of wireframe tools (e.g. Wireframe.cc and InVision) and Up-to-date knowledge of design software like Adobe Illustrator and Photoshop. Experience in HTML5 & CSS3 with knowledge of usability factors in Human Computer Interaction will be an added advantage.
