

Ministry of Health

Requirement Analysis and Development of Virtual Counter Application Service at Ministry of Health

Terms of Reference

A. BACKGROUND: Ministry of Health (MoH)'s Virtual Counter Application is about the various health-related activities and services. It is used as distribution tool for providing access to MoH application for virtual counter service.

B. OBJECTIVES: The objectives of the assignment are to design, develop and implement a clearly structured, responsive, professional looking for virtual counter application of Ministry for Health.

C. SCOPE

All pages of the Virtual Counter Application should be in both Dhivehi and English language.

In general Requirement (Virtual Counter Application) shall;

1. Application should be developed from any of these languages as listed below:
 - JavaScript, MSSQL, C#, .Net or .Net Core,
2. All users must be able to login via E-faas.
3. The portal should be integrated to E-faas.
4. All services must be added with the required payment amount and required documents.
5. Payment options differ from service to service. Hence, the administrator must be able to modify as given in administrator requirement.
6. Application forms should be filled online.
7. The portal should be integrated to the payment portal of Ministry of Finance (www.bandeyripay.finance.gov.mv).
8. Dates should be visible for each action (For example, application submission date, document acceptance date, document routed date, document completed date.)
9. All documents except pictures should be submitted in one PDF form and pictures must be in JPG/PNG format.
10. Applicants should receive a confirmation via SMS as soon as they submit the documents.
11. Document status bars must be adjustable for different services.

12. Mobile application must be developed.
13. Developer must study the existing portal and consult with the users before starting the development of the virtual counter application software.
14. Free service and maintenance must be given for 6 months starting from the date of usage.
15. Developer must be providing the training to IT Staff, Administrators and Users before starting to use the software.
16. All aspects and content of the software of virtual counter application should be managed through a Content of Management System without code operation.
17. Application should have a dashboard where all the updates can be seen.

4. The Following Features are Required an Application for Virtual Counter;

User Administrator and User 1: Administrator.

- a) Administrator should be able to create give roles for Users
- b) Administrator should be able to view all applications and supporting documents
- c) Administrator should be able to create and update online forms.
- d) Administrator should be able to add new services to the portal and also update the existing services.
- e) Administrator should be able to add or update the fees of the services. In some cases, Fee is taken before starting to process the applicant's requests. Some services require taking payment after completing the document and before handing the document to clients.
- f) Fee for some of the service is identified after inspection.
- g) Clients do not require paying for some services. Therefore, administrator should be able to make modification to fees of the services based on the requirement.
- h) Administrator should be able to set the virtual counter application opening and closing hours and days for clients.
- i) Staff must be able to login 24 hours.
- j) Administrator must be able to update staff and customer details as well.
- k) Administrator must be able to remove access from other staff accounts in case the staff leaves the organization.
- l) Administrator must be able to view the payment details of the applicants.

- m) Administrator must be able to assign staffs to departments
- n) Administrator must be able to generate reports of the application for a selected period of time.
- o) Administrator must be able to update the SMS template for each service separately.
- p) A separate message option should be given to each service.
- q) Administrator must be able to identify the history of the case starting from application submission to document approval by entering the document number or ID card number. (Dates and staff who handled the case)

- j) If necessary, department/division Staff should be able to add fees like fines to the total amount which the customer needs to pay.
- k) Department/Division staffs must be able to view the payment receipts once the payments are done.

5. Home Screen shall contain, be linked, but is not limited to;

- a) User friendly navigation bar
- b) Contacts for MoH and related information
- c) Attractive banner
- e) Publications and standards
- f) Countdown timer
- h) Laws and regulations

D. DELIVERABLES

1. The developer is expected to do a thorough requirement analyzing an application for virtual counter and provide a work plan for its development within 15 days from contract signing. The completed Virtual Counter Application should be handed over to MoH within 65 days
2. The developer is expected to provide a Virtual Counter Application template within 20 days from the signing of contract, and obtain approval from MoH before proceeding
3. On approval of design 'Virtual Counter Application' template by MoH, development shall commence immediately;
4. Weekly progress meetings shall be conducted with the focal point appointed by MoH after commencement of development.
5. User testing shall be carried out in collaboration with the focal point appointed by MoH after development.
6. The developer shall conduct a training session for selected user's.
7. The developer shall provide bug fixing support for a period of six (6) months from the time the "Virtual Counter Application" software is handed over to MoH.
8. Developer should develop "Stand Operating Procedure" SOP document for the application.

CLIENT'S RESPONSIBILITIES

1. MoH shall provide editable content in both Dhivehi and English language at the time the Design 'Virtual Counter Application' template is approved.
2. MoH shall provide access to the hosting space to the developer at the time the Design 'Virtual Counter Application' template is approved.

ELIGIBILITY

The following are considered to be as eligibility criteria with documented proof for this project;

- Minimum academic qualification of Level 5 standard approved by Maldives Qualifications Authority in the field of Information Technology, Software Engineering, Computer Sciences' or relevant field.
- Developer or firm should have delivered at least two software development projects.

Added Advantage

- Framework would be an added advantage;
- Technical knowledge on emerging internet technology and trends would be an added advantage;
- Working knowledge of security technologies would be an added advantage;
- Ability to deliver results based on agreed deadlines

Marking Criteria

1. Price – 60% (Quotation with the lowest price will be awarded the highest point and for the rest, points would be awarded by (ratio)
2. Qualification in relevant field – Total 20% marks includes: -
 - Diploma –5%,
 - Degree – 10%,
 - Masters – 20%
3. Experience – 20% 'Experience in software development' (Each experience letter would be counted as 5%)

Required Documents for (Individual)

1. ID copy
2. Qualifications (Certificates)
3. Curriculum Vita (CV) of the Developer
4. Experience Letter
5. Quotation

4. Firm

1. CV
2. Qualification (certificates)
3. Commitment letter of the Developer /Developers
4. Experience letters
5. ID card copy
6. Company registration copy
5. GST registration copy (if registered)
6. SME registration copy
7. Tax clearance report (3 months from the date of submission)
8. Quotation
