TNC follows previous work carried out by Republic of Maldives including First National Communication, (FNC), Second National Communication, (SNC), Maldives' Nationally Determined Contribution (NDC) and the Maldives First Biennial Update Report (BUR), sets a number of priority areas, and allocates adequate resources in the most cost-effective manner. Project components include: national circumstances; national greenhouse gas (GHG) inventory of anthropogenic emissions by sources and removal by sinks of all GHGs not controlled by the Montreal Protocol; programmes to mitigate climate change; measures to facilitate adequate adaptation; constraints and gaps, and related financial, technical and capacity needs, any other relevant information and preparation of the Third National Communication of the Republic of Maldives and submission.

In this regard, MECCT is seeking a qualified consultancy firm to conduct the GHG inventory analysis and assessments required under the TNC project.

5. Assist and provide necessary support for external verification of the GHG inventory
6. Compile the draft GHG inventory based on collected data

7. Revise the latest GHG inventory based on the above compilation and prepare the TNC Chapter on Greenhouse Gas Inventory
8. Archive data and capture inventory data, including but not limited to all inputs, sources, analyses and IPCC inventory software files.
