- Certificate of Authenticity specifying manufacturer/assembler is an OE a genuine reputed international engine brand	M or
a genuine reputed international engine brand	nent
8.3 If the manufacturer or assembler is not the same as the bidder, a docu	
	et to
indicating that manufacturer or assembler is willing to sell the generator	
the bidder is required	
8.4 Technical compliance letter will be required to enable technical evaluation	1
8.5 If the goods do not comply with the requirements mentioned in Section	III,
Technical Specifications, the bid will be rejected during evaluation.	
8.6 Generator set should comply with our requirements, if not the bid with	1 be
rejected	
9. Documents 9.1 Quotation (inclusive of the delivery period and payment terms)	
Comprising the 9.2 Specifications of the offered product	
Bid 9.3 Certificate of Authenticity specifying that manufacturer / assembler is an	EМ
of a genuine reputed international engine brand	
9.4 Details of the company	
- Company profile/background	
- Company registration certificate	
- GST registration certificate (for local bidders only)	
- TAX clearance report (6 months validity)	
- Contact details (name, designation, mobile number and e-mail address)
9.5 Experience letters, if available	
- Letters within past five (5) years	
- Relevant experience letters	
- Letters with project name and value

Fenaka Corporation Limited Male, **Maldives**

- Generator(s) should be tested to run at 25%, 50%, 75%, 100%, and 110% of 15.4 rated load and power factor until the engine temperature stabilized for 30 minutes, and should check the protections below:
 - Lub oil low level (alarm testing)
 - Lub oil low pressure (alarm testing)
 - Earth fault (alarm testing)
 - Over current (alarm testing)
 - High temperature (alarm testing)
 - Cooling system (alarm testing)
 - High voltage pressure (alarm testing)
 - All the functioning tests and routine tests should be done
- 15.5 All the protections should work properly, it should be examined for oil and coolant leaks, and it should be visually tested and secured
- 15.6 Recorded video clips while operating the unit(s) will not be accepted as virtual factory acceptance testing.

Section II: Evaluation Criteria

Proposal Cost: 60 points for the lowest price

(Lowest price / proposed price) x 60

Delivery: 30 points for the lowest delivery period

- (Lowest delivery period / proposed delivery period) x 30
- If the delivery period indicates 'ex-stock', it shall be taken same as the party offering the longest delivery period.

Credit Period: 10 points for the maximum credit period

(Proposed credit period / longest credit period) x 10

Note: Any discrepancy in technical details specified in quotation with technical specification document, the specification shall prevail.

Section III: Technical Specifications

Description	Quantity	
250kW Generator Set	01	

^{*}Please note that the below specifications are for one unit only.

S/N:	Description	Unit	Qty
1	250 kW prime rated diesel generator set with parameters 0.8 P.F, 415kV, 3 Phase, 4 wires, 50 Hz at 1500 r.p.m. Powered by Internationally reputed brand engine coupled with Internationally reputed brand Alternator. The Generator set shall be powered by a Branded engine origin or assembled/manufactured by an Original Company's Licenced OEM manufactured/assembler. The engine must produce a mechanical power output (kW _m) which should meet the	1	No
	required electric power (kW _a) of 250kW and must be coupled with a 250kW Alternator with pre-installed Droop CT and a control connection box.(termination box to connect control cables and power cables)		
	Engine to be complete with following auxilliary items : • Heavy electrical flywheel		
	SAE flywheel housing Air filters, Lubricating Oil Filters, Fuel Filters and all other such filter required for operation of the engine Low lubricating oil pressure switch		
	High engine temperature switch Iub oil sender Water Temperature Sender		
	All necessary items to run and to protect the engine Starting equipment fitted to engine, consisting of: 24 Volt charging alternator (Brushless)		
	24 Volt starting motor Fuel Shut-off solenoid Heavy duty lead acid batteries, supplied in a dry charged condition Governing System		
	The engine to be fitted with a close tolerance Electronic Governing system, which should include efc, actuators, magnetic pickups, etc, including wiring		
	 Cooling Equipment Cooling equipment compromising a heavy-duty tropical radiator, together with pusher type cooling fan and guards to be fitted. The radiator core should be electroplated with silver solder tin plated to prevent early failure due to corrosion. Coupon plated radiators are acceptable. Radiator has to be mounted on vibration mounts with enough strength to withstand the radiator and vibrations. 		
	Radiator must be designed to adequately cool the generator at an ambient temperature of 50°C • Exhaust system		
	450 mm of stainless steel bellow type flexible exhaust, together with suitable flanges and fittings shall be supplied for each silencer.		
	Alternator		

Page 7 of 8

Port Complex Building, 7th Floor, Hilaalee Magu, Male, 20207, Maldives

	The alternator shall be brushless revolving type altenator, having class H insulation on both the stator and field windings. It shall be built and rated to 8S 5000, tropically impregnated with voltage regulation being in the order of +/- 1.5% from no load to full load under the steady state conditions assuming a speed variation not exceeding 4% on the engine. Anti-Condensation Coil to be fitted in the Alternator.		
	Generator arrangement and drive		
	The simplex type base plate is of heavy duty rolled steel constructed, bolted and electrically welded, drilled on the underside to allow the fitting of foundation bolts. The engine and the alternator are to be mounted on a base plate and vibration mounts to be mounted underside of the base plate. The vibration mounts are to be supplied as loose item.		
	Finishing		
	After assembling the genset zinc coated self-etching primer should be		
	applied to the complete set.		-
1.2	Fuel system	1	No
	A fuel day tank of 12 hours capacity complete with level indicator, drain plug, filler, fuel return with fuel outlet connections and a fuel filter fitted with outlet connection is to be mounted. These mounts are are to be supplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.		
1.3	Factory testing	1	No
	The generator should be fully tested at the manufacturer workshop in the presence of client/apointees to check the ratings, overload, functional tests on a dummy load prior to dispatch	-	, no
1.4	Literature and drawings consisting of: 1 No x Manual on How to handle the generation equipment 1 Nos x Electrical wiring diagram 1 No x Engine operation and maintenance manual 1 No x Engine parts catalogue 1 No x Generator parts catalogue 1 No x Generator operation and maintenace manual 1 No x Generator AVR manual 1 No x Governor control unit manual 1 No x Engine shop manual	1	Lot
1.5	Accessories		
	The Components shall meet the British Standard and ISO standards. Items are for the		
	above mentioned generator sets.		-
1.5.1	Primary silencer barrel (to match engine exhaust)	1	No
1.5.2	Secondary silencer barrel (to match engine exhaust)	1	No
1.5.3	3m Exhaust pipe dia (to match engine exhaust)	6	No
1.5.5	Elbows having dia (to match the engine exhaust) Flanges having dia (to match the engine exhaust)	4	No No
1.5.6	Bolts, Nuts and Washers for the Flanges. (Each set shall include 1 bolt, 2	1	
1.5.7	washers, 1spring washer 2 Nuts) Split type rockwool insulation lagging suitable for 75 to 125mm dia. Exhaust pipes. The lagging shall be covered with High Quality Aluminium foil.	1	Lot
	water w		
1.6	Warranty Generator set should carry a warranty of one year from the date of commissioning		
	Senerator set should warry a Warranty of one year from the darp of commissioning	1
