

INFORMATION SHEET FOR PROCUREMENT OF 250KW GENERATOR SET

Reference No.: FNK-I/IUL/2022/442

Issued on 15th June 2022

Issued by:

Fenaka Corporation Limited

Male', Republic of Maldives

Section I: Instruction to Bidders

1. Scope of Bid 1.1 Fenaka Corporation Limited requests quotations for 250kW G	
1.1 Tenaka Corporation Enlined requests quotations for 250kW G	enerator Set
in accordance with Section III, Technical Specifications	
1.2 It is in Fenaka Corporation Limited's discretion to cancel the b	id invitation
mentioned in 1.1 at any time.	
2. Eligible 2.1 Local companies registered in Maldives are eligible to partic	cipate in the
Participants tender	
2.2 Foreign companies are eligible to participate in the tender only	y if the total
bid value is above 2,500,000 Maldivian Rufiyaa.	
B. Preparation of the Bid	
3. Bid Prices 3.1 The unit price of each item and the total price shall be clearly	indicated in
the quotation	
3.2 All items shall be quoted in the bid (please refer to Section II	I, Technical
Specifications for the details of required items)	
3.3 Quotation shall separately indicate the additional charges suc	h as freight
charges and Insurance.	
3.4 The bidder shall submit quotation on CIF basis to Male' port	
4. Currency 4.1 The bidder shall quote entirely in Maldivian Rufiyaa	
5. Alternative Bids 5.1 Bidders can submit a maximum of two (2) options	
6. Validity of Bids 6.1 Quotation shall remain valid for minimum sixty (60) days from	n the date of
bid opening	
7. Bid Security 7.1 All bids should be accompanied with a bid security of USD	2,000 (Two
Thousand US Dollars) or its equivalent in Maldivian Rufiyaa	
7.2 The bid security should be:	
- Original bank guarantee letter (or)	
- Bank guaranteed and stamped check (or)	
- An insurance policy from Maldives Monetary Author	ity (MMA)
registered insurance company	

Page 2 of 8

Fenaka Corporation Limited Male, **Maldives**

	7.3	Any bid not accompanied by a Bid Security shall be rejected during bid
		opening
	7.4	The bid security must be valid for a minimum of twenty (20) additional days
		beyond the validity of quotation
8. Technical	8.1	All relevant information including the brand shall be given to enable
Compliance		technical evaluation of quoted items
	8.2	The documents required for technical evaluation are:
		- Technical data sheets of engine and the alternator
		- Datasheets specifying cooling system rated at ambient temperature 50°C
		- Certificate of Authenticity specifying manufacturer/assembler is an OEM
		or a genuine reputed international engine brand
	8.3	If the manufacturer or assembler is not the same as the bidder, a document
		indicating that manufacturer or assembler is willing to sell the generator set
		to the bidder is required
	8.4	Technical compliance letter will be required to enable technical evaluation
	8.5	If the goods do not comply with the requirements mentioned in Section III,
		Technical Specifications, the bid will be rejected during evaluation.
	8.6	Generator set should comply with our requirements, if not the bid will be
		rejected
9. Documents	9.1	Quotation (inclusive of the delivery period and payment terms)
Comprising the	9.2	Specifications of the offered product
Bid	9.3	Certificate of Authenticity specifying that manufacturer / assembler is an
		OEM of a genuine reputed international engine brand
	9.4	Details of the company
		- Company profile/background
		- Company registration certificate
		- GST registration certificate (for local bidders only)
		- TAX clearance report (6 months validity)
		- Contact details (name, designation, mobile number and e-mail address)
	9.5	Experience letters, if available
		- Letters within past five (5) years
	I	

Page 3 of 8

Fenaka Corporation Limited Male, Maldives

		- Relevant experience letters
		- Letters with project name and value
	9.6	One (1) compact disc with original bid document scanned and written
	9.7	Bids lacking the documents above are subjected to be rejected during the bid
		opening
10. Format of Bid	10.1	The Bidder shall submit two (2) sets of the bid document (1 original and 1
		copy), enclosed separately in two envelopes and sealed with company stamp
	10.2	All pages of the bid document shall be stamped and bound properly
		(excluding the bid security)
C. Bid Submiss	ion	
11. Sealing and	11.1	The bid document shall be sealed properly in an envelope clearly marked
Marking Bid		'ORIGINAL' or 'COPY', with the name of the company and the tender
Document		reference number (FNK-I/IUL/2022/442)
12. Bid Opening	12.1	The bids will be opened on 29th June 2022, 10:00am in the presence of
		bidders
	12.2	Bids will be opened at:
		Fenaka Corporation Limited
		Hilaalee Magu, K. Male', Republic of Maldives
	12.3	Bids received electronically will not be accepted
13. Bid Rejection	13.1	Bidders that arrive after bid submission deadline shall not be able to
		participate in the bid
	13.2	Bidders that do not register for the tender are unable to participate in the bid
		opening
	13.3	Bids lacking the documents mentioned in 9. Documents Comprising the Bid
		(except 9.5 Experience letters) and that do not comply with 10. Format of
		Bid are subjected to be rejected
D. Awarding of	Contr	act
14. Payment	14.1	An advance will not be released for this project
Terms	14.2	Proposed payment terms should not be tied with submission of Bill of
		Lading.
<u> </u>		

Page 4 of 8

Fenaka Corporation Limited Male, Maldives

15. Factory	15.1	The generator(s) shall be fully tested at the manufacturer workshop in the
Acceptance		presence of Client's appointees via video conferencing.
Testing	15.2	The testing shall be conducted at internationally accepted testing standards
	15.3	The generator(s) shall be checked for dimension, the supplier shall provide
		dimension of the generator(s) during the virtual factory acceptance testing.
	15.4	Generator(s) should be tested to run at 25%, 50%, 75%, 100%, and 110% of
		rated load and power factor until the engine temperature stabilized for 30
		minutes, and should check the protections below:
		- Lub oil low level (alarm testing)
		- Lub oil low pressure (alarm testing)
		- Earth fault (alarm testing)
		- Over current (alarm testing)
		- High temperature (alarm testing)
	- Cooling system (alarm testing)	
		- High voltage pressure (alarm testing)
		- All the functioning tests and routine tests should be done
	15.5	All the protections should work properly, it should be examined for oil and
		coolant leaks, and it should be visually tested and secured

Section II: Evaluation Criteria

Proposal Cost: 70 points for the lowest price

(Lowest price / proposed price) x 70

Delivery: 20 points for the lowest delivery period

- (Lowest delivery period / proposed delivery period) x 20
- If the delivery period indicates 'ex-stock', it shall be taken same as the party offering the longest delivery period.

Credit Period: 10 points for the maximum credit period

(Proposed credit period / longest credit period) x 10

Note: Any discrepancy in technical details specified in quotation with technical specification document, the specification shall prevail.

Section III: Technical Specifications

Description	Quantity
250kW Genest	01

^{*}Please note that the below specifications are for one unit only.

S/N:	Description	Unit	Qty
1	250 kW prime rated diesel generator set with parameters 0.8 P.F, 415kV, 3 Phase, 4 wires, 50 Hz at 1500 r.p.m. Powered by Internationally reputed brand engine coupled with internationally reputed brand Alternator. The Generator set shall be powered by a Branded engine origin or assembled/manufactured by an Original Company's Licenced OEM manufactured/assembler.	1	No
	The engine must produce a mechanical power output (kW _m) which should meet the		
	required electric power (kW _e) of 250kW and must be coupled with a 250kW		
	Alternator with pre-installed Droop CT and a control connection box.(termination		
	box to connect control cables and power cables)		
	Engine to be complete with following auxilliary items :		
	Heavy electrical flywheel		
	SAE flywheel housing		
	Air filters, Lubricating Oil Filters, Fuel Filters and all other such filter required for		
	operation of the engine Low lubricating oil pressure switch		
	High engine temperature switch		
	• lub oil sender		
	Water Temperature Sender		
	All necessary items to run and to protect the engine		
	 Starting equipment fitted to engine, consisting of : 		
	 24 Volt charging altenator (Brushless) 		
	24 Volt starting motor		
	Fuel Shut-off solenoid Heavy data load sold bettering a smalled in a data days at the second solenoid.		
	Heavy duty lead acid batteries, supplied in a dry charged condition Governing System		
	The engine to be fitted with a close tolerance Electronic Governing system, which should include efc, actuators, magnetic pickups, etc, including wiring		
	Cooling Equipment		
	Cooling equipment compromising a heavy-duty tropical radiator, together with pusher type cooling fan and guards to be fitted. The radiator core		
	should be elecroplated with silver solder tin plated to prevent early failure		
	due to corrosion. Coupon plated radiators are acceptable. Radiator has to		
	be mounted on vibration mounts with enough strength to withstand the		
	radiator and vibrations.		
	Radiator must be designed to adequately cool the generator at an ambient temperature of 50°C		
	• Exhaust system		
	450 mm of stainless steel bellow type flexible exhaust, together with		
	7-2-2		
	• Exhaust system		

Page 7 of 8

1.6	Warranty		
1.5.7	Split type rockwool insulation lagging suitable for 75 to 125mm dia. Exhaust pipes. The lagging shall be covered with High Quality Aluminium foil.	1	Lot
	washers, 1spring washer 2 Nuts)	1	Lot
1.5.6	Bolts, Nuts and Washers for the Flanges. (Each set shall include 1 bolt, 2		200
1.5.5	Flanges having dia (to match the engine exhaust)	4	No
1.5.4	Elbows having dia (to match the engine exhaust)	6	No
1.5.3	3m Exhaust pipe dia (to match engine exhaust)	2	N
1.5.2	Secondary silencer barrel (to match engine exhaust)	1	N
1.5.1	above mentioned generator sets. Primary silencer barrel (to match engine exhaust)	1	No
	The Components shall meet the British Standard and ISO standards. Items are for the		
1.5	Accessories		
	1 No x Engine shop manual		
	1 No x Governor control unit manual		
	1 No x Generator AVR manual		
	1 No x Generator operation and maintenace manual		
	1 No x Generator parts catalogue		
	1 No x Engine parts catalogue		
	1 No x Engine operation and maintenance manual		
	1 Nos x Electrical wiring diagram		
	1 No x Manual on How to handle the generation equipment	-	LC
1.4	Literature and drawings consisting of :	1	Lo
	of client/apointees to check the ratings, overload, functional tests on a dummy load prior to dispatch		
	The generator should be fully tested at the manufacturer workshop in the presence		
1.3	Factory testing	1	No
	connection is to be mounted. These mounts are are to be suuplied as loose item. All necessary fittings to be supplied in conformity with fuel flow diagram.		
	A fuel day tank of 12 hours capacity complete with level indicator, drain plug, filler, fuel return with fuel outlet connections and a fuel filter fitted with outlet		
1.2		1	N
1.2	applied to the complete set. Fuel system	1	81
	After assembling the genset zinc coated self-etching primer should be		
	Finishing		
	and electrically welded, drilled on the underside to allow the fitting of foundation bolts. The engine and the alternator are to be mounted on a base plate and vibration mounts to be mounted underside of the base plate. The vibration mounts are to be supplied as loose item.		
	The simplex type base plate is of heavy duty rolled steel constructed, bolted		
	Generator arrangement and drive		
	insulation on both the stator and field windings. It shall be built and rated to BS 5000, tropically impregnated with voltage regulation being in the order of +/- 1.5% from no load to full load under the steady state conditions assuming a speed variation not exceeding 4% on the engine. Anti-Condensation Coil to be fitted in the Alternator.		
	The alternator shall be brushless revolving type altenator, having class H
