

FOUNDATION ASSEMBLY INSTRUCTIONS

- 1** Open box and remove all contents, making sure you have all parts shown.

Cover

Center Rail Side Rails End Rails Slats

- 2** Side and head rails are temporarily held together with brackets and pins. Remove pins to separate pieces by pulling up on pin.

- 3** Connect the Side and end brackets at the corners of the frame and secure with pin, making sure stickers with arrows point up

- 4** Center rail attaches by sliding brackets together from the top at head and foot of frame.

- 5** Roll out pre-spaced slats onto top of frame until each side is fully extended

- 6** Using pre-drilled holes in slats, screw each slate to rails in 3 places. Do not over tighten

- 7** Place cover onto frame making sure each corner is aligned tightly and entire frame is covered
