ABOUT US

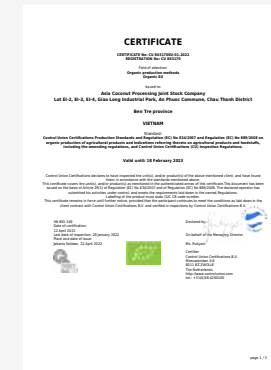

As the world is moving toward healthy and organic products, coconut related products have been consuming a huge volume in the recent years. Although the demand keeps increasing, the supply of coconut products is very limited. Among the coconut producing countries in the world, Vietnam - with the favorable natural conditions for growing coconut trees - is currently one of the ten biggest coconut producers. Taking advantages of this market opportunity, as well as the large area of coconut raw materials in Mekong Delta, Asia Ingredients Group (AIG) – the leading company in food ingredient sector in Vietnam – has decided to join this growing market by establishing Asia Coconut Processing (ACP) on 19/12/2014, a manufacturer specialized in producing variety of coconut products of high quality, using modern machines with the latest technology in production lines as well as high standards in management systems. ACP has also acquired many certificates of quality management, including: BRC, FSSC 22000, HACCP, HALAL, KOSHER, USDA & EU ORGANIC; company coconut products have been exported to more than 40 countries across different regions in the world.

CERTIFICATES

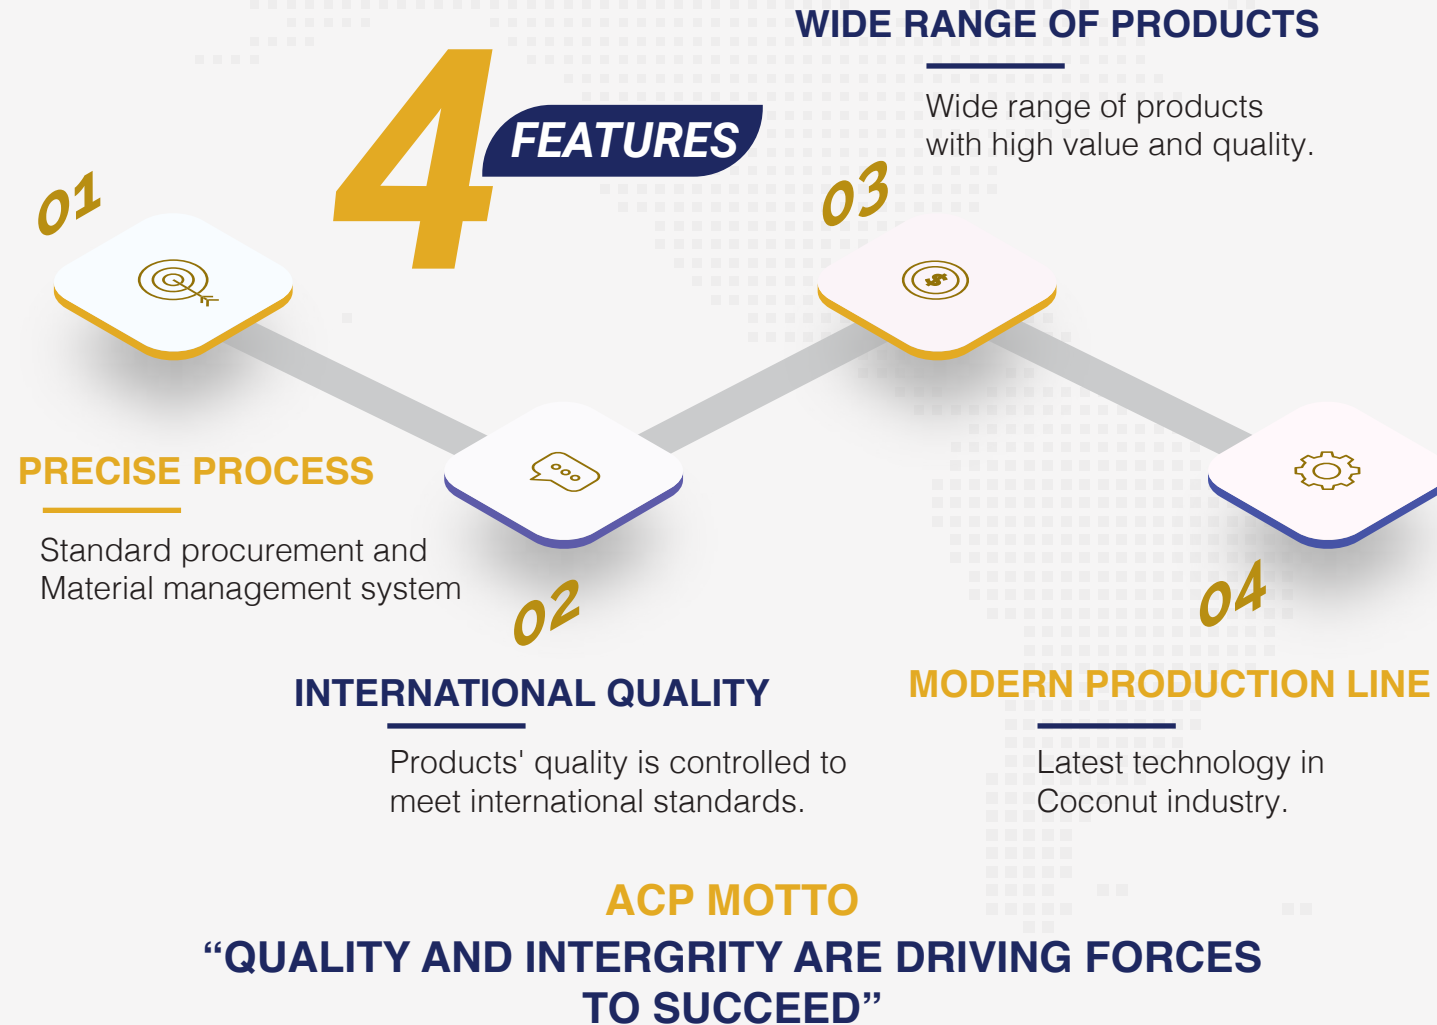

Certificate of National Quality Gold Award 2019

WHY ACP?

With the target of being the best Vietnamese manufacturer domestically and the most reputable exporter in the global market, Asia Coconut Processing is trying our best to provide the proper investment in technology as well as human resources to create top quality products and services. This would drastically increase the value of Vietnamese agriculture product as a whole and create an international image for Vietnamese Coconut Product.

VISION - MISSION

VISION

Become a reputable and reliable manufacturer and exporter, where products are vigilantly controlled to meet international standards, matching the very high regulations and requirements of regions/ countries such as Europe, America, Japan, etc.

Diversifying and adding more value to coconut products.

MISSION

Create a strong and stable bond between the Company and Ben Tre coconut farmers, contribute to the development of Vietnam Agriculture.

Create high value products up to international standards and ever-growing demands from global markets, elevate the image and value of Vietnam Agriculture in general, and specifically Vietnam Coconut in the international market.

Build up the stability, sustainable development and long-term commitment between the Company and his labours.
