Dried fruits & Nuts

*Growth Together - Dried Fruits & Nuts*

# Goodvalley

Our company carries out its production and farming activities in the heart of Central Chile, the Colchagua Valley, a region marked by thorough soil work, respect for rural traditions and respect for the local community. Thanks to the combination of growers with 30 years of experience and its younger team members, Goodvalley knows how to balance the demand from international markets and its mission to listen to and understand their customers.

We believe in long-term relationships built upon flexibility, innovation, ethics and an unwavering commitment to quality. Every single day, our team uses its "South of the world" passion to meet our customers' expectations.

## ABOUT US

### LOCATION: COLCHAGUA VALLEY

Our facilities are located in the Colchagua Valley. This valley has a Mediterranean climate and moderate temperatures, producing fruit of great ripeness, taste and color.

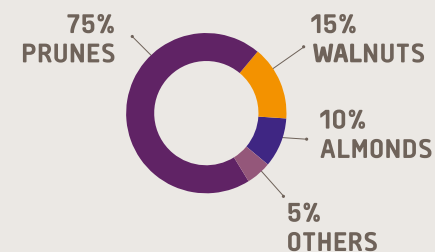

### 100% TRACEABILITY

Straight from our orchards "Santa Amelia", "Los Olivos", "Las Arañas" and "El Ciruelo", to your table. We are growers, processors and exporters; therefore, we can guarantee outstanding quality, as we are present throughout each step of the entire production chain.

### THE PROCESS

Our new plants are outfitted with the latest infrastructure and processing technology. The fruit is pitted and then tenderized in our ovens to create dried prunes that ensure customers a steady moisture content and suitable texture, guaranteeing the lowest percentage of pit fragments in the final product.
