THROAT

Bees collect propolis from buds and use it as a natural shield to protect the hive. This formula, combining green propolis with honey and thyme extract, has a pleasant effect on the respiratory tract.

ENERGY

Royal jelly, which is produced by bees, is the queen bee's staple food, ensuring that she lives 40 times longer than the worker bees. This preparation of honey and royal jelly, enriched with manganese, will help you to stay energised on a daily basis.

FIBRE & PROTEINS

The bee collects pollen from the stamens of flowers and transports it to the hive in the form of small pellets. This gem, naturally rich in fibre and a source of protein, is an essential nutrition for the colony.

IMMUNITY

This preparation concentrates the four gems of the hive produced naturally by bees: honey, royal jelly, green propolis and pollen. Combined with vitamin D, this formula is a true support when it comes to promoting proper immune system function.

THE PROS

✓
A benefit on all references

✓
A range focused on the hive's gems

✓
Stable textures to suit all uses
