COMPANY HISTORY

A FAMILY STORY, A PASSION FOR COFFEE HANDED DOWN FROM GENERATION TO GENERATION FOR OVER 150 YEARS.

1ST GENERATION

In 1870, in Messina, Domenico Barbera started a small business of coffee roasting. His skill at roasting coffee at dawn with a small, manual, coal-burning machine earned him the title ‘The Coffee Wizard’.

2ND GENERATION

Following the death of Domenico Barbera (1903) and the catastrophic earthquake of Messina (1908), Antonio Barbera, son of the founder, rebuilt the company from practically nothing, becoming a point of reference for the supply of coffee for Sicily and Calabria.

3RD GENERATION

In the historic inter-war period, Antonio’s passion, handed down also to his son Domenico, overcame the hardship of the war: the entrepreneurial growth of Barbera showed no signs of stopping.

4TH GENERATION

The years of the economic boom saw the construction of a new building thanks to Domenico, who, in 1970, left the reins of the business in the hands of his son, Vittorio. With great entrepreneurial skill, he transformed the family business into one of the leading coffee roasters in Italy, notably increasing production capacity. The exportation of Caffè Barbera overseas was started.

5TH GENERATION

With the beginning of the new millennium, the leadership of the company passed to Vittorio’s sons, Antonio and Francesco. Under the management of the two brothers, coffee roasting witnessed further growth: focus on excellent production standards and an environmental policy allowed the company to obtain important international certifications. Attention to customer service and signing prestigious partnerships has led to the consolidation of the Barbera brand, both in Italy and abroad.

6TH GENERATION

In 2014, Federica, Vittorio and Alessandra, Antonio and Francesco’s children joined the company. These new actors in the history of Caffè Barbera, with great experience acquired abroad, have brought a wave of dynamism aimed at consolidating the brand all over the world, even more.

*V and VI Generation:
Antonio and Francesco Barbera with their sons
Vittorio, Federica and Alessandra*

Since 1870, the Barbera family has been roasting and selling coffee: it is a 150-year-old tradition which today means *we produce a unique product ready to satisfy our customers' needs*, a fundamental value on which the company from Messina has founded its philosophy.

The oldest family coffee roasters in Italy, is synonymous with excellence due to its selection of *the best coffee beans*, an elevated attention to *social and environmental issues*, particular care in every phase of the *production process*, and continual *research and innovation*.

COFFEE ROASTERS IN SICILY SINCE 1870

ETHICS AND ENVIRONMENT

CAFFÈ BARBERA HAS BUILT
ITS STRATEGY AROUND
A SUSTAINABLE BUSINESS MODEL

WE INVEST AND COMMIT HUMAN AND TECHNOLOGICAL RESOURCES TO REDUCE ENVIRONMENTAL IMPACT BY:

Studying biodegradability and the use of biodegradable and recyclable packaging

Checking and controlling emissions

Implementing a system of environmental management control, conforming to ISO 14001 standard

Obtaining certifications of conformity to organic production processes

Minimizing energy consumption thanks to a solar power system

WE OPERATE FULLY RESPECTING THE PRINCIPLES OF ETHICS AND SOCIAL RESPONSIBILITY:

We promote professional training in collaboration with the Italian Association for Social Reintegration (CIRS) and the Ministry of Education.

We sustain countries of origin by realizing several social projects.

The company holds to the principles of Fair Trade.

THE COFFEE WIZARD

IN EVERY CUP OF COFFEE THERE IS SOME HIDDEN MAGIC AND FOR ANY MAGIC WORTHY OF THIS NAME THERE IS A MAGICAL FORMULA WHICH MUST BE CARRIED OUT TO PERFECTION.

THE MAGICAL FORMULA IS CREATED HERE, IN THE PLANTATIONS OF THE COUNTRIES OF ORIGIN

We pay regular visits to the plantations to select the beans used to make up our blends. It is a complicated process. Single lots of coffee are analysed and tasted many times to test the stability and physicochemical properties of every bean. In the company Research and Development laboratory we study and analyse all our coffees.

ROASTING

The beans lose weight, increase in volume, release aromatic notes and change colour. This enchantment is realized following a process which has been refined over decades, where even the smallest detail can make the difference: the slow roasting method. Each batch is monitored during the roasting curve following specific parameters which, after years of experience, have become our faithfully respected standards.

BLENDING... THE MOMENT OF THE ART

The blending process foresees the mixing of coffees of different origins which give life to unique blends. Experience, passion, attention to detail and dedication come together in old and new recipes, making our blends unique and inimitable.
