Seasonal beers

OEM info

We develop recipes tailored to your and your customers' requests and **brew original beer**. We also produce **original label products** using standard products and limited edition products.

Regarding the production of original beer and original label products, we will listen to your requests and make proposals based on our production status.

Below are cases in Japan:

Original Label - Fujisan Craft Beer

At the request of Mirex Co., Ltd., we produced two types of original labels in response to the request for Fujisan Beer, which is brewed with spring water from the rich nature of Kosuge Village, Yamanashi Prefecture. We can also handle luxurious labels such as foil stamping like this one.

Original Beer - like Japanese famous souvenir

At the request of Mirex Co., Ltd., we created an original beer that expresses Yamanashi Prefecture's famous confectionery, Kikyo Shingen Mochi, as a beer. At the JR East Souvenir Grand Prix 2022, we won first place in the number of votes for the "Souvenir Award at Work" by recipient.

Original Beer - Super Market PB products

We produced original label beer at the request of Ogino Co., Ltd., a general retail company with stores in Yamanashi, Nagano, and Shizuoka prefectures. It was sold as Ogino Select Premium (PB product), which is particular about materials and quality.

Original Beer - Collaboration with Beervana Thailand

Collaborated with Thailand's largest craft beer distributor "Beervana" to create the first products for the Far Yeast brand to enter Thailand.

For the "ARAN Wood Aged Pilsner" project, we teamed up with Beervana's brewing department, "The Brewing Project". For our "YUZU Sour Ale", we invited our friends from the Thai brewery "Samata" to join us to produce a collaboration product of all three companies.
