- Tyre

Fresh and Packaged foods

We use 'Water Based Inks' to avoid any contamination on direct food contact.

Labels used in the food industry serve the need for an eye-catching effect at the point of sale. They also support branding.

Food labeling is the most diverse of all labels, ranging from product tracking and marking sell-by dates to promotion.

Labels are prepared for

Cold and moist surfaces subsequently placed in deep freeze storage.
Surfaces in contact with fat and oil.

Labels can be used for

Price marking: Retail Information
Labeling for transportation: Logistics & Transport
Labeling on liquid dairy products & water & juice bottles.

Beverages

Eye-catching metallic sheen or elegant paper & foil combined with latest graphic design.

Labels with excellent printability, convertibility & durability.

Self-adhesive labels enable a flexible design & individual customization.

Home Care/ Personal Care

Conformable & squeezable.
Resistant to water, oils & chemicals.
Assistive in visual differentiation.
Supportive of a strong brand image.
The 'no-label' look with Clear filmic PP labels.
Open Closure Labeling.

Plain Labels and Tags

Complete range of A4 papers & films for monochrome & color printing.
Office labeling.
Small office & home information labeling (SOHO).
Logistic & laboratory labeling.
All kinds of industrial labeling.

Retail

Price Marking:

Labels printed in one or two colors.
Variable information printing (VIP) techniques.
No need for high environmental resistance.

Catch-weight labeling:

For labeling fruits & vegetables, ECO direct thermal face materials are used for short life catch-weight labels.
For labeling meats & cheeses, *TOP direct thermal face materials are used.

Durables

For the lifetime of the product.
For model identification & serial numbers.
For warnings & safety instructions.
For variable information printed by thermal transfer when UL approval is required.

Pharmaceutical

Pre-printed & plain barcode Labels.
Labels for specific application like, special papers, PVC, PET & PP.
Labels to give information about ingredients and manufacturers.

• • • • •

Logistics and Transport

Labels are used for routing, inventory & tracking & tracing.

Broad range of labels sizes & materials for this segment.

These labels are Scratch Resistant.

• • • • •

Oil lubes & Industrial Chemicals

Water and chemical resistant labels for Labels for outdoor use which in particular require durability.

Customized labels for bulk chemicals, oils & paints, & building & agricultural products.

Standard paper or film label materials are used to avoid intrusion of hazardous chemical components.
