pH	3.5-5.0	pH [10% w/v Sol ⁿ]
Density	1.240-1.280	g/ml [at 20°C]
Viscosity	<250	Centipoise

Addition Guidance

VISUAL COLOUR INDICATOR	FLAVOUR	TYPICAL ADDITION RATE
	Sweet, Malty	Classic Malt Beverage (malt + hops/flavours)
		Flavoured Malt Beverage (malt + sugar + flavours and/or juice)
		6-9 kg/hl
		>2.2 kg/hl

EAGLE is a versatile malt extract which can be used in the manufacture of both classic 'all malt' and flavoured malt beverages. Use at a higher addition rate together with hops or flavours to create a classic malt beverage, or blend with sugar, flavours/juice and colour to create a flavoured malt drink. In addition to malt flavour, EAGLE provides natural sweetness, colour, mouth-feel and foam. It is filtered to produce a clear extract which minimises interactions with other ingredients and supports ease of use in soft drink/RTD production. EAGLE is halal certified and suitable for the production of 0.0% non-alcoholic beverages.
