

## **Your Contract Partner for Milling and Grinding**

---

Service made in Germany since 1985

We take  
quality  
personally

## Our Manufacturing Services

- Milling
- Grinding
- Micronization
- Cryogenic Milling
- Fractionated Sieving
- Homogenization / Blending
- Repackaging

## Your Products for Milling

- Food Ingredients
- Nutrients
- Vitamins and Supplements
- Natural Ingredients
- Enzymes
- Fibers

Missing your products? [Let us know!](#)

## Our Contract Lab Services

- Analysis of Particle Size Distribution (PSD)
- Development, Transfer and Validation of PSD Measurement Methods

## Excellence Crafted in Germany

Milling is a highly effective technique used in the food industry to process raw materials, resulting in improved absorption and product stability while reducing waste. With our extensive expertise in particle design, we can provide our customers with efficient and consistent solutions to their manufacturing processes by utilizing state-of-the-art equipment and safety protocols. Our advanced technology enables us to reduce particle size to less than 5  $\mu\text{m}$  through ultra-fine milling, delivering optimal results for your unique needs. With our many years of experience in the pharmaceutical industry, you can rest assured that we handle your products with the utmost care and precision.
