

INCREASE YOUR CROP YIELD AND
ELIMINATE HARMFUL BACTERIA

An agricultural bactericide
featuring bacteriophage technology.

AgriPhage®

BACTERICIDE

PRODUCT HIGHLIGHTS

AgriPhage is a bacteriophage (virus) that attacks bacterial spot and speck in tomatoes and peppers.

Fights bacterial resistance when integrated into existing IPM programs.

Can be tank-mixed and rotated with other insecticide and fungicide products.

AgriPhage is extremely selective to the target bacterium and will not harm beneficial organisms.

Does not cause soil build-up or damage to equipment.

Always carefully read and
follow label instructions.

OMNILYTICS™
THE PHAGE COMPANY

HOW IT WORKS

Bacteriophages destroy bacteria through a process called “lysis”. The infection process begins the moment a phage comes in contact with a bacterium. Bacteriophages infect host bacteria on contact and convert them into tiny virus factories. Within 30 minutes of infection the host cell disintegrates, releasing the phage progeny to infect other host bacteria.

HOW IT PERFORMS

As a result of viral replication, AgriPhage actually increases in concentration due to the fact that the virus remains constant and replicates under favorable environmental conditions to continue its attack on additional bacteria.

AgriPhage can be used in organic tomato and pepper production under the USDA National Organic Program, but can also be used to enhance performance of conventional tactics in fields where bacteria has been problematic.

TANK MIXING		STORAGE	TIMING
Compatible with most fungicides, insecticides, fertilizers. Do not mix with copper or iron products. (See label compatibility table at www.AgriPhage.com)		AgriPhage should be stored in areas where the product temperature does not exceed 85 degrees Fahrenheit.	Preventive to protect growing fruit and leaf tissues or when conditions are conducive for disease infection, and as a curative when the first disease symptoms are visible. Apply as needed.
RATE	RECOMMENDED USES	PHI/REI/PH	USE WITH OTHER TREATMENTS
1 to 2 quarts of AgriPhage/ acre/ application	AgriPhage can be used in existing programs where conventional controls have not been effective.	Zero Day PHI 4 Hour REI pH range is 6.0 – 8.5 Above is a tank mix range for pH that must be maintained.	Please allow 24 hours application between AgriPhage and copper-based products.
