

Pasfrost is a leading producer and distributor of high-quality frozen vegetables. We have been offering our customers full service for more than 40 years, which has allowed us to grow into one of the biggest European producers of frozen vegetables.

Locally based producer

Pasfrost lies in the heart of West Flanders. We benefit from all the advantages the region has to offer: a maritime climate, a fertile soil and the knowhow our farmers gathered over several generations that provide us with a rich assortment of healthy and great tasting vegetables.

Our annual production capacity amounts to 120,000 tonnes of deep frozen vegetables.

Worldwide sales

Although we are locally based for production purposes, we sell our frozen vegetables worldwide. We have customers in over eighty countries spread across the five continents. As a result Pasfrost is one of the European leaders in the production of frozen vegetables.

Quality guarantee

Thanks to our rigorous quality and hygiene rules, Pasfrost has obtained a number of quality certificates which have been renewed year after year. For our customers this is a guarantee that we consistently offer reliable top quality.

- The **BRC label** is an internationally recognised food and quality certificate issued by the British Retail Consortium. Pasfrost has obtained 'Grade A', a very high score.
- The European **IFS quality label** is issued by the 'International Food Standard'. Like the BRC label it was created by the retail sector. Pasfrost has obtained the 'Higher level', also an excellent score.

These certificates show that Pasfrost fully complies with the rigorous quality rules and passes all the critical quality tests.

100% traceability

Because Pasfrost is fully vertically integrated as a producer of frozen vegetables, we can guarantee our customers 100% traceability. In the interest of food safety, we are able to trace the full flow of each product we deliver in no time, thanks to an efficient scanning system that covers variety, cultivator, plot, harvesting, production & packaging dates ...
