Hundred Years of Excellence

From the Hearth of Aegean

Dried Figs

Tarış Fig Union, which contributes mainly to the national economy by protecting the producers' great efforts, has been working on providing the member growers with the most appropriate data regarding their production, presenting the developments in terms of production, phytosanitary, productivity, quality and legislation to the knowledge of the producer, increasing the yield and quality during the production and processing phase, introduction of technologies, developing by-products related to dried figs, and product diversification phases. The Fig Processing and Storage Facility, which is established on a land of 60,000 m², has a closed area of 43,000 m², by having a storage capacity of 12,000 tons per year, and 15,000 tons of dried fig processing capacity per year is one of the largest fig facilities in the world.

Fig Delight

Pasted figs are cooked in the cauldrons with various ingredients like walnut, pistachio and hazelnut. The mixtures are placed in special molds, rested for a while and cut into cubic forms.

High percentage fruit are produced from 100 % natural sugar without using glucose and dried figs are cut in strip shaped. They represent tradition and innovation together with orange, ginger and walnut options with 100% genuine Tarış quality.

Dried Fig Jam

Cologne Types

Tarış cologne factory was found in 1971. Lemoni lavender, tobacco, after shaves and different types of premium colognes have been produced in Tarış cologne factory. There is no methyl alcohol in our production. Tarış Lemon Cologne is the first TSE registered cologne of Turkey. Lemon cologne scent has been formed of 11 ingredients.
