

# ePSM

| The #1 PSM platform for industrial refrigeration.

ePSM takes the guess work out of OSHA's Process Safety Management and EPA's Risk Management.

ID	Priority	Recommendation/Findings	Due Date	Responsible Parties	Status	Completion	Budget	Actions
0108	***	Verify that training requirements are up to date for each employee.	Feb 6, 2023	Danilo Cordeiro, Danilo Cordeiro	NOT COMPLETED	Not Completed	\$0	+
0109	***	Include in the emergency action plan assigning an individual to shut off PHSD, only in event of an incident ammonia release.	Jul 7, 2023	Danilo Cordeiro, Danilo Cordeiro	COMPLETED	Jul 1, 2023	\$0	+
0114	***	Assess that process safety information includes updated peak capacities for all equipment used in other PSM. Consider reviewing PHSD for A11-5, A11-6, A11-15, 18 and compressed C-6 are not shown.	Jul 7, 2023	Danilo Cordeiro, Danilo Cordeiro	COMPLETED	Nov 30, 2022	\$0	+
0103	**	It is recommended to provide an ammonia charge post equipment with a charge space and service valve for safety pressure release.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Sep 29, 2022	\$0	+
0102	**	Assess each unit design and installed as all design and that caps are installed on ammonia piping at entrances after a design is.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Sep 22, 2022	\$0	+
0101	**	Verify the operating status of the purges that is now tagged out of service.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Dec 1, 2022	\$0	+
0100	**	Apply lock down devices and tag location values of unbalanced check valves provided for hazardous materials.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Jun 5, 2023	\$0	+
0109	**	Assess that purger value is maintained to a PPS range of 4.5 to 10.5 before disposal into the drain.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Dec 29, 2022	\$0	+
0108	**	Verify that tags were submitted for each incident made that open having consequences with consequences.	Feb 14, 2023	Danilo Cordeiro	COMPLETED	Feb 2, 2023	\$0	+

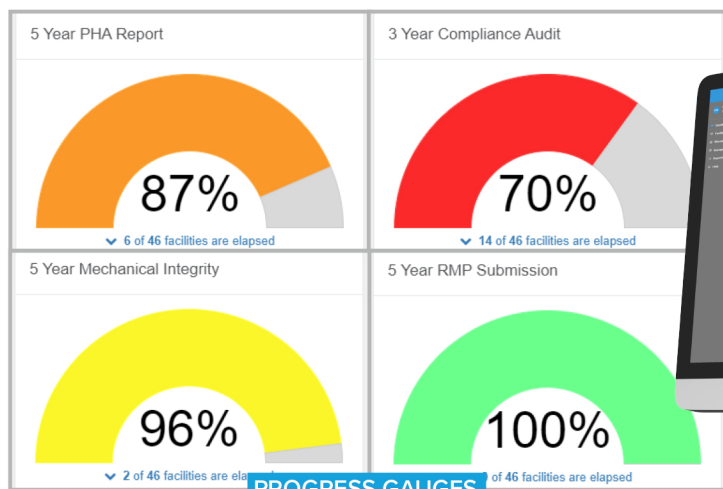

Stay on top of compliance and make informed decisions with ePSM's powerful insights and real-time data tracking capabilities.

- Designed with technicians in mind, ePSM allows for quick recordkeeping and organization of PSM & RMP.
- Automatic compliance alarms for every element required by OSHA PSM.
- Permission-based structure allows employees access to their areas of responsibility.
- Included checklists and templates can be modified to align with your existing PSM program.
- Users have the ability to observe real-time data across their sites directly in ePSM.
- Automatic notifications for managed facilities and effortless oversight of every location.

With global experience, over 3.9 million inspections generated, 5.6 million lbs. of ammonia managed, and a 98% retention rate - you can trust ePSM to take care of your companies PSM requirements.

## TAKE CONTROL OF YOUR FACILITY

Unlock powerful insights with ePSM's Corporate Dashboard, designed for leaders managing multiple facilities. Use configurable KPI scorecards and real-time tracking for upcoming and elapsed tasks, corrective actions, MOC and inspection approvals, and more to streamline and standardize compliance across your entire portfolio.
