VITAMIN ENHANCED WATER BEVERAGE

Why vitamin water?

You're always on the move, making waves, seizing opportunities and taking life as it comes.

However the extraordinary individual needs more than just the ordinary to thrive and truly achieve.

Vitamin water strengthens your bone, structure, immunity, digestion, vision and provides you with complete inner strength. So switch over to no ordinary hydration, because you're no ordinary person.

That is why you need Vitamin Water!

To stay at the top of your game with hydration enriched with Vitamin B3 (Niacin), B5 (Pantothenic Acid), B6 (pyridoxine), B7 (Biotin), B9 (Folic Acid), B12 (Cyanocobalamin).

Niacin (Vitamin B3):

It's used by your body to turn food into energy.

It helps keep your nervous system, digestive system and skin healthy, and also boosts brain function.

Pantothenic Acid (Vitamin B5):

In addition to playing a role in the breakdown of fats and carbohydrates for energy, vitamin B5 is critical to the manufacture of red blood cells.

It helps keep skin soft, smooth and healthy. It also has an anti-inflammatory effect that can help stimulate your skin's healing process while deeply hydrating it.

Pyridoxine (Vitamin B6):

Vitamin B6 supports brain function, the immune system, and the transportation of oxygen around the body.

It also helps create neurotransmitters, such as serotonin and dopamine, hence enhancing your mood.

Biotin (Vitamin B7):

Supports many of your body's systems, including your nervous system, liver, eyes, hair, and skin.

Contributes to having healthy & strong hair and nails.

Folic Acid (Vitamin B9):

Folic acid is crucial for proper brain function and plays an important role in mental and emotional health.

It aids in the production of DNA and RNA, the body's genetic material, and is especially important when cells and tissues are growing rapidly, such as in infancy, adolescence, and pregnancy.

Works with vitamin B12 to form healthy red blood cells, which carry oxygen around the body.

Folic acid may help reduce your risk of heart disease by reducing high blood pressure and improving blood flow.

Cyanocobalamin (B12):

It plays an essential role in red blood cell formation and anemia prevention, cell metabolism, nerve function and the production of DNA.

Supports bone health, energy levels and mood.

With
7 flavors available
3 of them being carbonated vitamin water.

Why Immunity?

- 300% Vitamin C
- Full of antioxidants
- Slows down the effect of aging
- Zinc fights the symptoms of flu
- Supports your immune system
- Decreases inflammation
- Reinforces memory function
- Reinforces heart health
- Lowers cholesterol levels
