

**SATISFYING
THIRST
SINCE
1959**

ABC was established in 1959, starting with the first beverage filling line solution, co-packing , and beverage manufacturing, to fulfill the gap between our clients' needs and the market's offering. In 1983, ABC began manufacturing carbonated soft drinks, followed by five new production lines, to meet consumer expectations and remain in the market from generation to generation. In 2008, al Esayi started manufacturing energy drinks and earned about %65 of the overall energy drinks market share in Saudi Arabia. Al Esayi possesses only one purpose: to have a footprint by serving our clients with filling solutions and manufacturing quality products.
