

SALADA AMAZÔNIA

Nature's Masterpiece

SALADA AMAZÔNIA

The Açaí Palm is well known for its fruits, but it also produces the nature masterpiece Heart Palm SALADA AMAZÔNIA, which is delicious, crunchy outside and creamy inside. It has few calories and low fat. It has plenty of dietary fibers, vitamins A, B, C and minerals like zinc, potassium and iron.

Salada Amazônia is healthy and environment friendly, being certified with ORGANIC and KOSHER BDK SEALS.

The wide consumption of SALADA AMAZÔNIA heart of palm promotes Amazon Rainforest's sustainable development, preserving the native forest.

Açaí palms are native trees which occupy miles of Amazon Rainforest. They are different from other palms for their constitution, since a single root produces several palm branches at the same time.

When an açaí palm branch is cut to extract its heart, the single root continues developing and generating new branches, which allows SUSTAINABLE MANAGEMENT of the palm trees products.

When a palm reaches the height that hinders harvesting its açaí fruits, it's time for local communities to extract the heart of palm. This timing to harvest the heart of the palm is what makes its extraction possible without depleting the trees, taking care of the nature with responsibility, assuring the açaí fruit to next generations.

Native community has a crucial role in the sustainable management of açaí. Açaí fruits and the heart of the palm are manually harvested. This harvesting gives local communities a way of living that generates income without forest devastation and fires.

NATURE'S MASTERPIECE

Through environmental care of Amazon forest, it's possible not only to transform the native community economic conditions, but also to give customers a high quality healthy product with unique flavor. This makes Salada Amazônia consumption an act that brings advantages to everyone.

Salada Amazônia. Enjoy its incomparable taste.

CERTIFICATES

The Organic Product Seal ensures that the product, process, or service complies with the standards and practices of organic production. This is achieved through a certifying agency accredited by the Ministry of Agriculture, MAPA, and the National Institute of Metrology, INMETRO.

The Organic seal indicates that this product fulfills the requirements and that it has been produced through approved methods. This demonstrates that Salada Amazônia contributes to preserve the Amazon Rainforest, its biodiversity and self-sustainability.

Meets all certifications for the European Common Market.
