Dried Apricots

Dried apricots from Tajikistan are renowned for their natural taste, eco-friendliness, and high quality. They are traditionally sun-dried without added sugar or preservatives. Popular varieties include Urik (with the pit) and Kaisa (pitted). Modern producers like Zardolu utilize advanced technologies for processing and packaging, meeting ISO and HACCP standards. These apricots are actively exported to Russia, Europe, the USA, and the Middle East, gaining popularity for their rich flavor and health benefits.
